

# Software

## FactoryTalk AssetCentre System Design and Implementation Course Description

### Course Agenda

#### Day 1

- Getting Started with a FactoryTalk AssetCentre System
- Establishing a FactoryTalk AssetCentre System Architecture
- Installing the Required Software for a FactoryTalk AssetCentre System
- Configuring and Organizing the Asset Tree in FactoryTalk AssetCentre Software

#### Day 2

- Archiving Files in FactoryTalk AssetCentre Software
- Managing Archive Files in FactoryTalk AssetCentre Software
- Configuring Disaster Recovery and an Asset Inventory in FactoryTalk AssetCentre Software
- Backing Up and Restoring Critical Software Configurations for a FactoryTalk AssetCentre System

#### Day 3

- Finding a System Event Using FactoryTalk AssetCentre Logs
- Planning Security for a FactoryTalk System
- Configuring Application-Layer Security in the FactoryTalk Directory
- Configuring Security within FactoryTalk AssetCentre Software
- Viewing System Information from the FactoryTalk AssetCentre Web Client
- Troubleshooting a System Using FactoryTalk AssetCentre Software

### Course Number

FTAC

### Course Purpose

This course provides you with the skills required to use FactoryTalk® AssetCentre software to maximize your control system investment and manage assets effectively. Throughout the course, you will learn how to design a FactoryTalk AssetCentre system, install and configure the software, secure access to the control system, track users' actions, manage asset configuration files, provide backup and recovery of operating asset configurations, and troubleshoot your system using FactoryTalk AssetCentre software.

Your instructor will demonstrate how to perform all of the tasks covered in this course. You will then be given an opportunity to practice these tasks using a procedures guide and VMware images designed to simulate a real production facility.

After completing this course, you should be able to design and implement a FactoryTalk AssetCentre system, including:

- Developing a full, detailed FactoryTalk AssetCentre system specification
- Configuring source and version control for specified files and assets
- Configuring Disaster Recovery for all desired files and assets

## Who Should Attend

Individuals who need to securely and centrally manage automation production environments using FactoryTalk AssetCentre software should attend this course.

## Prerequisites

To successfully complete this course, the following prerequisites are required:

- Ability to perform basic Microsoft Windows tasks
- Knowledge of your production environment
- General understanding of industrial networks

## Technology Requirements

All technology is provided for student use in the classroom by Rockwell Automation. It is not necessary for students to bring any technology with them when attending this course.

## Student Materials

To enhance and facilitate the students' learning experience, the following materials are provided as part of the course package:

- *Student Manual*:
  - Includes the key concepts, definitions, examples, and activities
- *Lab Book*:
  - Provides learning activities and hands-on practice
- *FactoryTalk AssetCentre Procedures Guide*
  - Provides step-by-step instructions for tasks that are common to all FactoryTalk AssetCentre systems

## Hands-On Practice

Throughout this course, you will have the opportunity to practice the skills you have learned through a variety of hands-on exercises. These exercises focus on the skills introduced in each lesson.

To complete the exercises, you will use VMware images designed to simulate a production facility. You will practice designing the system, configuring the software, and troubleshooting common production issues.

Because the basic skills taught in the course apply to all software platforms, you can then apply what you have learned to the specific platform that you use in your plant.

## Next Learning Level

Once you have an understanding of the topics and skills covered in this course, you may want to attend specific FactoryTalk software training such as:

- *FactoryTalk Historian Site Edition Configuration and Data Collection* (RS-FTHSE)

## Course Length

This is a three-day course.

## IACET CEUs

Rockwell Automation is authorized by IACET to offer 2.1 CEUs for this program

## To Register

To register for this or any other Rockwell Automation training course, contact your local authorized Allen-Bradley® Distributor or your local Sales/Support office for a complete listing of courses, descriptions, prices, and schedules.

You can also access course information via the Web at <http://www.rockwellautomation.com/training>

Rockwell Automation is accredited by the International Association for Continuing Education and Training (IACET) and is authorized to issue the IACET CEU. [Click here](#) to view the Rockwell Automation Certificate of Accreditation.
