

Focusing on Your Energy Savings Opportunities

Energy use in commercial and industrial buildings accounts for the lion's share of operating costs. Saving energy has been an important business strategy for many companies and there are many steps you can take to reduce costs and create a better environment inside and outside your own walls. Here are a few areas we can look at to reduce your demand and consumption.

Lighting & Lighting Control

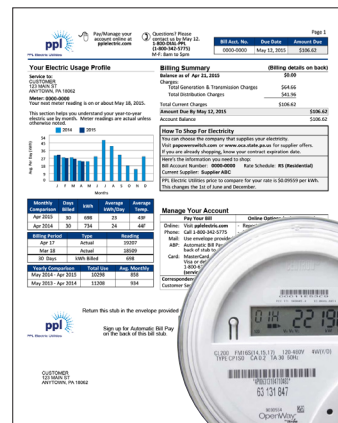

- ☐ Interior and Exterior Lighting Designs
- ☐ Interior and Exterior Light Fixtures
- ☐ Lamps and Ballast
- ☐ Fixture Retrofit Kits
- ☐ Intelligent Lighting Control Systems
- ☐ Daylight Harvesting Systems
- ☐ Window Shade Systems

Power Distribution

- ☐ Energy Management Systems
- ☐ Facility Power Distribution and Equipment
- ☐ Distribution Transformers
- ☐ NEMA Premium Energy Efficient Motors
- ☐ Variable Frequency Drives (VFDs)
- ☐ Uninterruptible Power Systems (UPS)
- ☐ Energy Efficient Data Centers
- ☐ Demand and Power Control Strategies
- ☐ Power Quality

Onsite Power Generation

- ☐ Solar Photovoltaic Power Systems
- ☐ Energy Storage
- ☐ Combined Heat and Power (CHP)
- ☐ Electric Vehicle Charging Stations
