

# Controllers & Visualization Technologies and Products

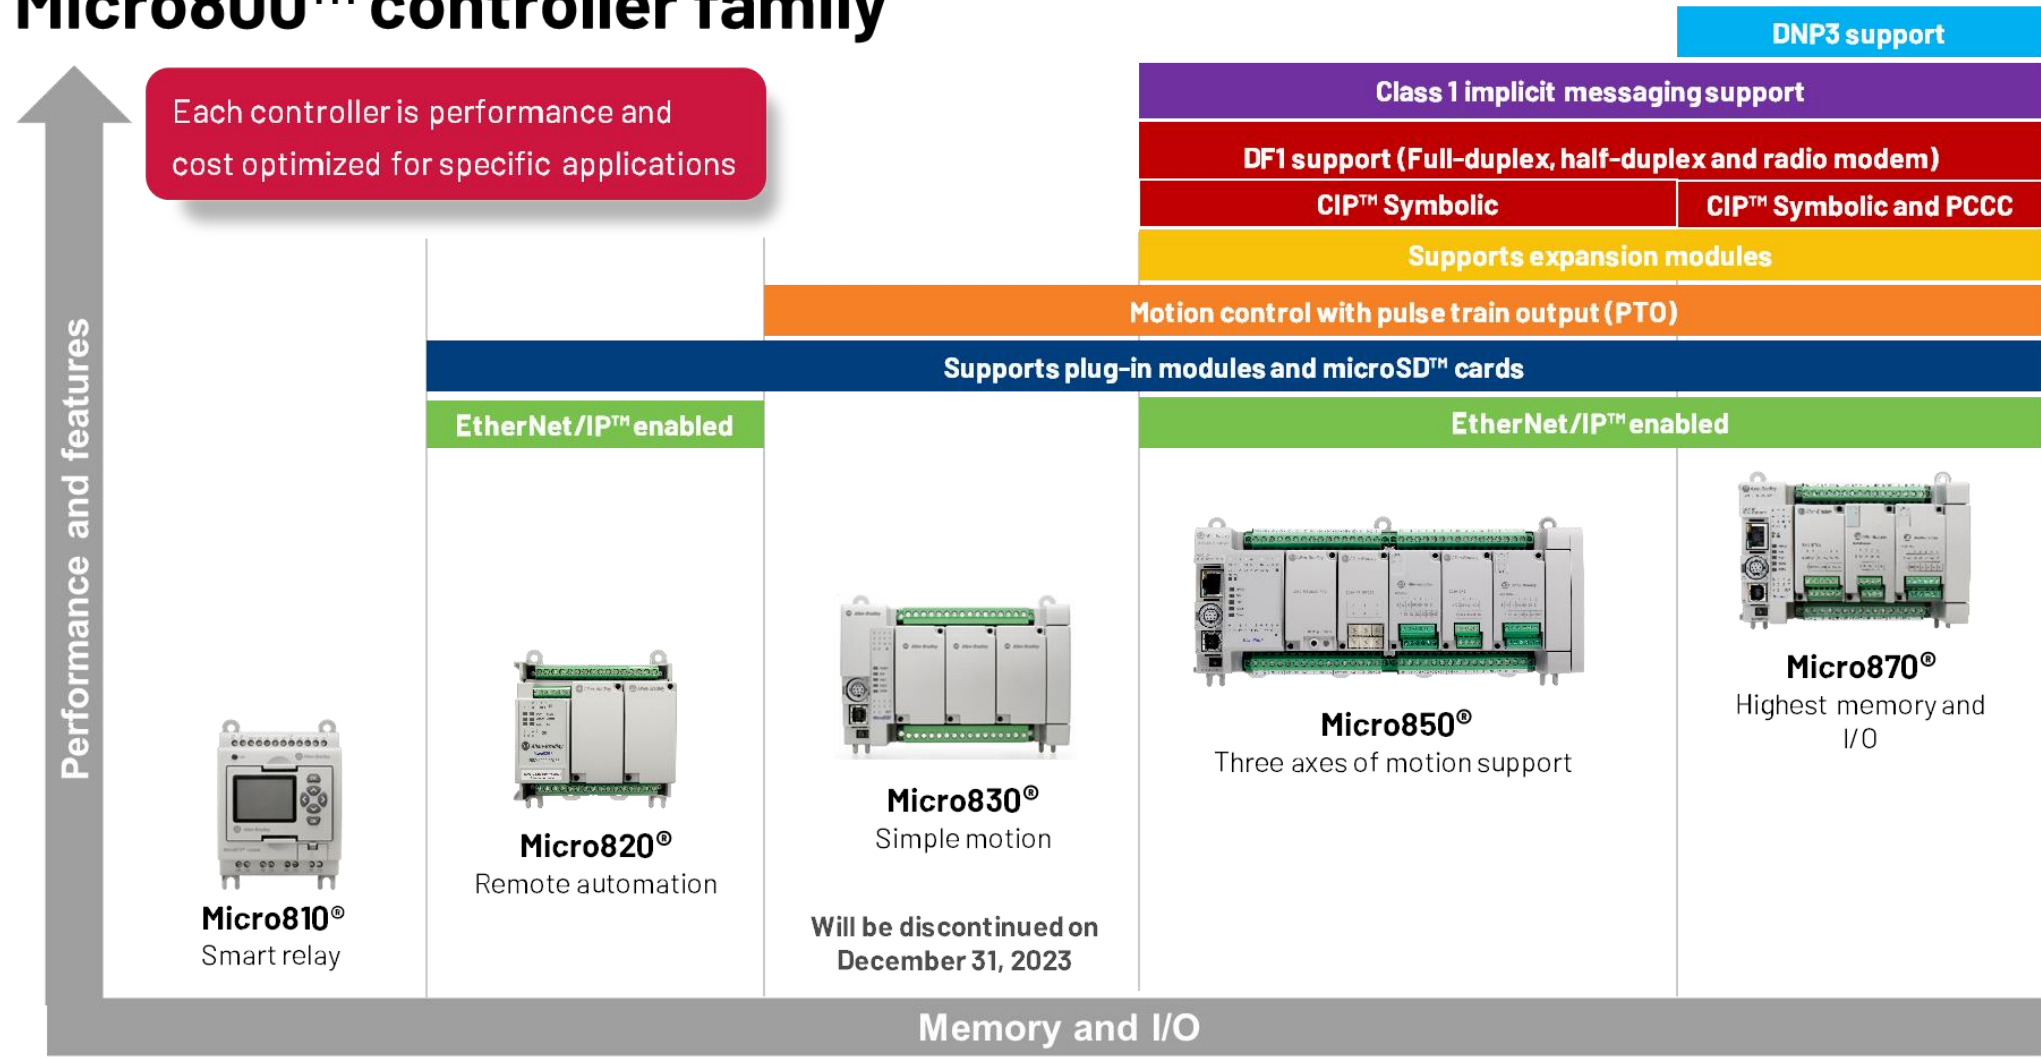

**SYD Expo March 28, 2024**

**Products and Solutions for the Electrical Industry**

# Micro800<sup>®</sup> Controllers

## Micro800™ controller family

## Micro850<sup>®</sup> and Micro870<sup>®</sup> controller catalogs 2080-Lx0E

Improve controller performance

### Improved download and upload time for the new catalogs 2080-Lx0E

- Download time improved by 40% and upload time improved by 23%, as compared to catalogs 2080-LC50x or 2080-LC70x
- Reduce customer development time

### Improved customer throughput

- 2-3x improvement in the following areas:
  - Code execution
  - Embedded I/O response
  - Math instruction processing
  - Communication processing

# New and enhanced capabilities for Micro850® and Micro870® 2080-Lx0E controller catalogs

Micro800™ controller with Connected Components Workbench™ software version 21 provides implicit messaging support to EtherNet/IP devices

- Supported in Micro850® 2080-L50E and Micro870® 2080-L70E controller catalogs only
- Requires firmware revision 21.011
- Pre-defined tags available for PowerFlex® 520 series and Kinetix® 5100 drives
- Generic tags for all other EtherNet/IP devices
- Up to eight devices supported
- Pre-developed user-defined function block(UDFB)instructions for PowerFlex® 520 series and Kinetix® 5100 drives

# CompactLogix Portfolio

## CompactLogix™ 5480 controller

- Integrated Motion on EtherNet/IP up to 150 axes
- Includes three GbE EtherNet/IP ports supporting both dual IP and Linear or Device Level Ring topologies up to 250 nodes
- Enables high-speed I/O, motion control
- Provides a Logix based real-time controller that runs in parallel to an instance of Windows 10 IoT Enterprise
- Enhanced security features

## CompactLogix™ 5380 controller

- Integrated Motion on EtherNet/IP up to 32 axes
- Two Ethernet ports for dual IP or support for linear and Device Level Ring topologies for up to 180 nodes
- Enables high-speed I/O, motion control
- Integrated safety up to SIL 2, PLd Cat. 3 versions
- Enhanced security features

## CompactLogix™ 5370 controller

- Integrated Motion on EtherNet/IP up to 16 axes
- Linear and Device Level Ring network topologies for up to 80 nodes
- Integrated safety up to SIL 3, PLe Cat. 4 versions
- On-Machine™ version

Multiple  
disciplines

Flexible and  
scalable

One common  
design environment

## CompactLogix™ 5480 controller

### Multiple disciplines

- Integrated Motion on EtherNet/IP™ up to 150 axes
- Enables high-speed I/O, motion control
- Builds upon the same high-performance architecture first introduced with the ControlLogix® 5580 and CompactLogix™ 5380 controllers

### Enhanced productivity with Logix

- Includes three GbE EtherNet/IP™ ports supporting both dual IP and Linear or Device Level Ring topologies up to 250 nodes
- Provides a Logix based real-time controller that runs in parallel to an instance of Windows 10 IoT Enterprise
- Supports up to 31 local Compact 5000™ I/O modules
- Offers simplified architectures with built-in communications, peripheral connectivity,
- Integrated DisplayPort and multiple high-speed Gigabit Ethernet ports

### Security capabilities

- Enhanced security features
- Offers embedded Logix security with FactoryTalk® Security user authentication and authorization

## CompactLogix™ 5380 controller

### High performance

- Dual one Gb Ethernet port enables high-performance I/O and Integrated Motion on EtherNet/IP™ up to 32 axes
- Controller firmware is optimized for maximum performance

### Enhanced productivity with Logix

- Two Ethernet ports for dual IP or support for Linear and Device Level Ring topologies for up to 180 nodes
- Supports up to 31 local I/O modules and memory from 0.6 ... 10 MB
- Onboard display allows for enhanced diagnostics and troubleshooting
- USB port supports local programming, troubleshooting and firmware updates

### Security capabilities

- Digitally signed and encrypted controller firmware
- Controller-based change detection and logging
- Role-based access control to routines and Add-On Instructions
- Ability to enable and disable all embedded ports

## Compact GuardLogix® 5380 Controller

### High performance

- Dual one Gb Ethernet port enables high-performance I/O and Integrated Motion on EtherNet/IP™ up to 32 axes
- Controller firmware is optimized for maximum performance
- Safety program execution optimized for high performance

### Enhanced productivity with Logix

- Two Ethernet ports for dual IP or support for Linear and Device Level Ring topologies for up to 180 nodes
- Supports up to 31 local I/O modules and standard memory from 0.6 ... 10 MB
- Supports safety memory from 0.3.....5 MB
- Onboard display allows for enhanced diagnostics and troubleshooting
- USB port supports local programming, troubleshooting and firmware updates

### Security capabilities

- Digitally signed and encrypted controller firmware
- Controller-based change detection and logging
- Role-based access control to routines and Add-On Instructions
- Ability to enable and disable all embedded ports

## CompactLogix™ 5370 L3 Controller

### Multiple disciplines

- Dual Ethernet ports support Integrated Motion over EtherNet/IP™ for up to 16 axes of motion
- Supports Device Level Ring and Linear topologies
- Control at the machine level for applications requiring smaller amounts of I/O

### Enhanced productivity with Logix

- Status indicators offer immediate status of communications, module health and I/O activity
- Local expansion modules support up to 30 local expansion modules with 1769 I/O for increased functionality
- USB port supports high performance and speed for programming and firmware updates

### Safety capabilities

- Three-position mode switch selector provides an added layer of security
- Access door allows easy access to the SD card and mode switch

# Compact GuardLogix® 5370 Controller

## High performance

- Provides integrated safety and motion in a controller
- Supports integrated safety up to SIL 3, PLe Cat. 4
- Supports up to 16 axes of motion on EtherNet/IP™

## Enhanced productivity with Logix

- Removable one GB SD card improves data integrity
- Support for kinematics removes the need for additional robot controllers and software
- Reduce need for a network switch with Device Level Ring and Linear support
- Safety status indicators provide on-going safety status about the system
- USB port supports high performance and speed for programming and firmware updates

## Safety capabilities

- Three-position mode switch selector provides an added layer of security
- Access door allows easy access to the SD card and mode switch

# CompactLogix™ 5370 L2 Controller

## Multiple disciplines

- Dual Ethernet ports support Integrated Motion over EtherNet/IP™ for up to four axes of motion
- Supports Device Level Ring and Linear topologies

## Enhanced productivity with Logix

- Status indicators offer immediate status of communications, module health and I/O activity
- Embedded power supply offers a smaller form factor for maximized cabinet space
- Universal inputs and outputs offer increased configuration flexibility with Embedded Universal Analog inputs/outputs
- High-Speed Counter inputs support increased performance
- Helps enable more simplified device replacement
- Supports easier initial configuration and deployment
- USB port supports high performance and speed for programming and firmware updates

# CompactLogix™ 5370 L1 Controller

## Multiple disciplines

- Dual Ethernet ports support Integrated Motion over EtherNet/IP™ for up to two axes of motion
- Supports Device Level Ring and Linear topologies
- Supports up to two axes kinematics for simple articulated robotics

## Enhanced productivity with Logix

- Increased storage capacity offers up to one MB of user memory for increased storage capabilities
- USB port supports high performance and speed for programming and firmware updates
- Status indicators offer immediate status of communications, module health and I/O activity
- Combines the Logix platform with the flexibility of POINT I/O™ modules

## Multiple disciplines

- Standard and safety control on the machine
- One supports Integrated Motion over EtherNet/IP™ up to 16 axes
- Integrated safety control up SIL 3, PLe, Cat. 4
- Dual Ethernet ports support Linear and Device Level Ring topologies
- Rated for Ingress Protection (IP67) and UL Type four applications and environments

## Enhanced productivity with Logix

- Removable one-GB SD card provides nonvolatile memory and permanently stores user programs and tag data
- Four onboard status displays allow for enhanced diagnostics and troubleshooting
- Built-in power supply enables power for each device
- Minimizes hardware in the control cabinet
- Quick-connect cabling streamlines system wiring

## Safety capabilities

- Safety status indicators provide on-going safety status
- Easy access to the controller mode switch, USB port, SD card and power supply fuse via four captive screws

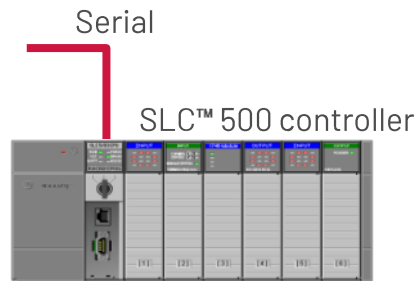

## Armor™ CompactLogix™ and Armor™ Compact GuardLogix®

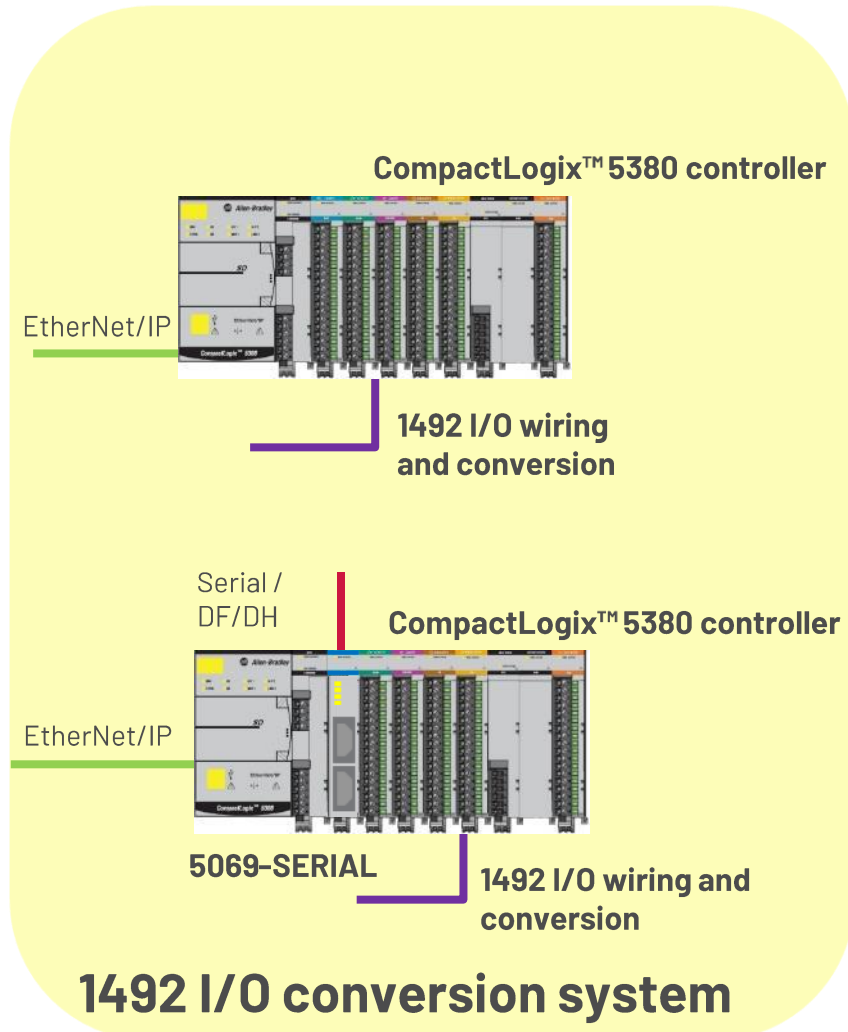

# SLC Migration

# SLC™ 500 to CompactLogix™ 5380 control system modernization

Modernization

# RSLogix 500® to Studio 5000® application – Code conversion

SLC™ control system

CompactLogix™ 5380 control system

- Convert 80...100% of code using automated code conversion
- Take advantage of power constructs and features that can be leveraged for improvement of applications
- All RSLogix 500® v12 Pro, Standard and Starter applications support the Integrated Migration to Studio 5000 Logix Designer® application
- RSLogix 5000® Translation Tool, v1, v2, v3 and RSLogix™ Project Migrator are now the Integrated Migration to Studio 5000 Logix Designer® application

# 1492 I/O wiring and conversion system

## Overview

### Advantages

- Provides an easy migration from existing SLC™ 500 control system to a complete CompactLogix™ 5380 control system.
- Allow customers to upgrade their control system while maintaining their existing control cabinet and without rewiring their existing field devices.
- Save installation time by using existing mounting holes.

### Values

- Speed - Reduce I/O rewiring time and effort significantly.
- Compatibility - Pre-engineered and pre-tested conversion modules convert old SLC™ I/O terminations to the new equivalent Compact 5000™ I/O terminations.
- Retain existing SLC™ I/O chassis footprint.

**Note:** Conversion module cables shown are longer than actual length

# ControlLogix Portfolio

# ControlLogix® 5570 controller

## Multiple Disciplines

- Process, motion, discrete, and high-availability applications can run on the same Logix control engine
- Common control engine and one development environment for optimized productivity
- Conformal coating offers added protection in harsh environments
- Integrated Motion on EtherNet/IP™ up to 100 axes
- Redundancy supports high availability requirements
- Removable terminal blocks allow Removal and Insertion Under Power (RIUP)

## Enhanced Productivity with Logix

- Onboard display allows for enhanced diagnostics and troubleshooting
- USB port for easy troubleshooting, programming and firmware updates
- Secure Digital (SD) card provides nonvolatile memory and permanently stores user programs and tag data

## Security Capabilities

- Three-position keyswitch provides mode selection and added security
- Digitally-signed and encrypted controller firmware
- Controller-based change detection and logging
- Role-based access control to routines and Add-On Instructions

# GuardLogix® and GuardLogix-XT™ 5570 Controllers

## Multiple Disciplines

- High-performance, safety control for extended protection in standard and extreme environments -25...70 °C (-13...158 °F)
- GuardLogix-XT™ controller provides increased protection in ISA G3 environments
- Conformal coating offers added protection in harsh environments
- Integrated Motion on EtherNet/IP™ up to 100 axes
- Integrated safety control up to SIL 3, PLe, in the same chassis as standard and XT controllers

## Enhanced Productivity with Logix

- Onboard display allows for enhanced diagnostics and troubleshooting
- USB port for easy troubleshooting, programming and firmware updates
- Secure Digital (SD) card provides nonvolatile memory and permanently stores user programs and tag data

## Security Capabilities

- Three-position keyswitch provides mode selection and added security
- Digitally-signed and encrypted controller firmware
- Controller-based change detection and logging
- Role-based access control to routines and Add-On Instructions

# ControlLogix® 5580 controller

Hardware features

## Onboard display

Enhances diagnostics and troubleshooting

## USB port

Eases programming, troubleshooting and firmware updates

## Integrated energy storage

No battery required

## Secure digital card

Ships with two GB storage card and provides optional storage for firmware, user program and tag data

## Conformal coating

Helps protect in harsh environments

## GuardLogix 5580 Safety Controller

### Optimize safety and productivity together

The GuardLogix® 5580 safety controller integrates standard and safety control into one controller, software and network. This can reduce development time, purchasing costs and maintenance demands for your systems. Plus, it offers safety functions that can reduce downtime.

- **Safe torque off** allows machines to restart faster after reaching a safe state by removing motor torque without removing power from an entire machine
- **Safety zones** can improve productivity by allowing motion to continue on a machine outside of a safety zone that has experienced a trip

**Save space and time:** GuardLogix 5580 controllers can achieve faster reaction times and shorter safe distances than legacy controllers. This helps create smaller machines, save floor space and increase operator efficiencies.

**Optimize your safety system design:** The controller can achieve SIL 2, PLd, CAT 3 with a primary controller and SIL 3, PLe, CAT 4 with the addition of a safety partner.

- Standard memory options from 3...20 MB
- Safety memory options from 1.5...6 MB
- Communication options from 100...250 EtherNet/IP nodes
- Conformal coated options for harsh environments

# Studio 5000 Logix Designer v36

**v36**

## **Hardware Support**

- 5032 IO-Link
- 1756-L85ES
- iTRAK® 5750

## **New Capabilities**

- Embedded OPC UA
- Granular Safety Signatures
- Additional Safety RLL Instructions
- Axis Test Mode for Safety
- Motion Indirect Referencing

## **Ease-of-Use**

- Multi-device Interaction
- Workstation EDS Harmonization

## OPC UA + Studio 5000 Logix Designer®

Bringing OPC UA  
Communications to the  
Controller Level

**OPC UA**

### Communications

#### Key Features

- ControlLogix® 5580 (including safety and process versions)
- CompactLogix™ 5380 (including safety and process versions)
- Expose controller data via OPC UA
- As an OPC UA Server, or as an OPC UA Client
- Integrated OPC UA Security using FactoryTalk® Policy Manager v6.40 for certificate generation and management

#### Benefits

- Enables third-party connectivity at the controller
- Logix controllers can directly communicate with other automation devices with built-in OPC UA
- Enables seamless data integration between multiple platforms
- Allows for simpler software architecture

## Granular Safety Signatures

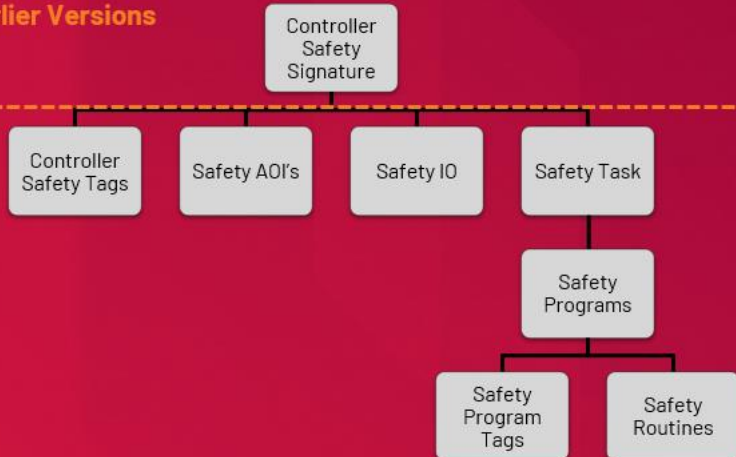

**Verify Safety Signatures for every Safety Application Element**

### Signature Validation Hierarchy and Report

**Version 36**

**Earlier Versions**

Safety

### Key Features

- Additional Safety Signatures at lower component levels
  - Previously only available at the controller level
- Available for 5x80 Logix Controllers
- Generate a Safety Signature Report for all Safety Signature IDs

### Benefits

- Faster time to market by reducing validation and testing time
- Save time during startup and throughout the lifecycle of a machine
- Access and manage safety component signatures in a unified way
- Valuable for Validated Industries

# Safety Ladder Instructions

Safety

## Key Features/Benefits

- Expanded support for Standard Ladder Logic instruction in Safety
- Create more code in Safety routines, instead of referencing Standard routines for desired code functionality
- Simplified programming for easier management, maintenance, and troubleshooting
- Reduce Safety routine dependencies on external routines

## Additional Safety Ladder Logic

### Added Safety Ladder Logic

Compare	Trigonometric	Advanced Math	Math Conversion	Array File / Shift	Array File / Misc.
Is Infinity	Sine	Log Base 10	BCD to/from Integer	Bit Shift Left	File Average
Is Not a Number	Cosine	Natural Log	Degrees to/from Radians	Bit Shift Right	File Standard Dev
	Tangent	X to the Power of Y	Truncate	FIFO Load	
	Arc Sine			FIFO Unload	
	Arc Cosine			LIFO Load	
	Arc Tangent			LIFO Unload	

## Mnemonic Updates

**Align Mnemonics with Industry Standards**

## Additional Operators

**Additional Math Operators Available for Safety**

### Standards

#### Key Features/Benefits

- Instruction mnemonics updated to align with industry standards
- Existing files will automatically be updated when moving to Studio 5000 Logix Designer® v36
- Achieve consistency and standardization among different projects in the system with vendor-neutral terminology
- Reduce the risk of errors with automatic conversions to the code over multiple applications

#### Key Features/Benefits

- Includes Advanced Math, Math Conversions, and Compute / Math operators
- See User Manual or Online Help files for complete list
- Simplifies programming by completing more Safety-related operations in the Safety routine

## Axis Test Mode

**Achieve Motion Virtualization  
for Safety**

Axis Test Mode Configuration

Motion Group: MG

Enable	Axis Name	Configuration	Device
<input type="checkbox"/>	Ax_J1_CD	Controller Loop Back	K5700_J1J2:Ch1
<input type="checkbox"/>	Ax_J2_CD	Controller Loop Back	K5700_J1J2:Ch3
<input type="checkbox"/>	Ax_J3_CD	Controller Loop Back	K5700_J3J4:Ch1
<input type="checkbox"/>	Ax_J6_CD	Controller Loop Back	K5700_J3J4:Ch3
<input type="checkbox"/>	Ax_PS01	Controller Loop Back	K5700_PS1:Ch1

Disable All   Enable All

Messages:

### Motion

#### Key Features

- (v35) Axis Test Mode for motion virtualization for Kinetix®, PowerFlex®, and iTRAK® 5730 CIP Motion devices
- Validate safety code including safety tasks, CIP Safety drive connections, safety feedback, safety attributes, and pass-through safety parameters

#### Benefits

- Execute motion control
- No dependencies on physical motion hardware during design or testing, reducing overall cost
- Data and tag values can be tracked and see performance visually without hardware

# Motion Indirect Addressing

## Extension of Reference Data Types in Motion

### Direct

```
MAM(Axis1,mam_control[0],moveType,endPos,speed,Unitspersec,accel,  
Unitspersec2,decel,Unitspersec2,SCurve,100,100,%ofTime,Disabled,Current,0,None,0,0);  
  
MAM(Axis2,mam_control[0],moveType,endPos,speed,Unitspersec,accel,  
Unitspersec2,decel,Unitspersec2,SCurve,100,100,%ofTime,Disabled,Current,0,None,0,0);  
  
MAM(Axis3,mam_control[0],moveType,endPos,speed,Unitspersec,accel,  
Unitspersec2,decel,Unitspersec2,SCurve,100,100,%ofTime,Disabled,Current,0,None,0,0);
```

### Indirect

```
FOR mam_index = 0  
TO 3  
BY 1  
DO MAM(axisInstanceID[mam_index],mam_control[mam_index],moveType,endPos,speed,  
Unitspersec,accel,Unitspersec2,decel,Unitspersec2,SCurve,100,100,%ofTime,Disabled,Current,0,None,0,0);  
END_FOR;
```

## Key Features

- Provide use of an ID# reference for the axis in motion instructions
- Create efficient code by using this variable in the motion instructions instead of the named axis
- This is an extension of the Reference data types in Motion instructions

## Benefits

- Enables efficient code
- Simplified code can result in improved system performance and improved memory utilization

## Multi-device Interactions

**Cut/Copy/Paste in IO Tree**

## Workstation EDS Harmonization

**Consistent EDS, IO-Link IODD,  
and HART DD between  
workstations**

### Usability

#### Key Features/Benefits

- Use Cut/Copy/Paste to duplicate devices in an IO tree
- Enhance productivity by eliminating tedious manual configuration of each device
- Also supported in L5X file

#### Key Features/Benefits

- New Export feature facilitates seamless transferring of device description files (EDS, IO-Link IODD, and HART DD) between workstations
- Delivers consistency in device information
- Simplifies workflows and reduces likelihood of error

# IO Module Platforms

## Benefits of POINT I/O™ modules

Key differentiators

### Removal and insertion under power (RIUP)

- No rewiring, no power cycle
- **Integrated safety**
  - Up to SIL 3, PLe and Cat. 4
- **Granularity, scalability and configurability**
  - 2, 4, 8 points (digital and analog)
  - Fault mode configuration (analog output)
  - Configurable filters (digital and analog)
  - Module-level sampling rate (RPI)
- **CIP messaging**
  - Online reconfiguration
  - Direct connections
  - EtherNet/IP to PC (personal computer) capable

## FLEX 5000® I/O

Next generation 5000 series I/O platform technology

### Rugged design

Operating temperature:  
-40...+70 °C  
(-40...+158 °F)

Hazardous environments:  
Class I, Div. 2  
Zone 2 Groups  
A, B, C, D

### Performance

1 gigabit (Gb) EtherNet/IP  
1 gigabit (Gb) backplane speed

### Standard I/O

8/16/32-channel digital in/out  
8-channel analog in/out

### Safety I/O (SIL 3, PLe, Cat. 4)

16-channel digital in/out  
4-channel analog in/out

### Network media and topologies

2 copper/2 fiber ports  
Supports Device Level Ring (DLR), Star,  
Linear, Parallel Redundancy Protocol  
(PRP)

### Easy snap-on installation

Removal and Insertion Under Power  
(RIUP)

### Consistent I/O wiring

Direct termination of 2-, 3- and  
4-wire devices

Distributed I/O for ControlLogix® 5580 controller, **GuardLogix® 5580 safety controller**  
Distributed I/O for CompactLogix™ 5380 controller, CompactLogix™ 5480 controller, **Compact GuardLogix® 5380 safety controller**

## Visualization

## PanelView™ 5310

A right-sized visualization solution for smaller applications

### FEATURES

- Connect to one **ControlLogix®** or **CompactLogix™** processor through embedded Ethernet port
- On-screen navigation button easily displays information
- Up to 100 screens
- Five screen size options: 6", 7 W", 9 W", 10", 12 W"
- Two USB hosts, one USB device, one SD card
- c-UL-us, CE, KC, RCM, EAC, RoHS
- NEMA and UL Type 12, 13, 4X, also rated IP66 as classified by UL

## PanelView™ 5510

Designed for OEMs and end users who require a high degree of integration between their HMI and controller

### FEATURES

- Touch-only or touch+ keypad option
- Connect to as many as four ControlLogix® or CompactLogix™ processors
- Up to 500 screens\*
- Two Ethernet ports with internal switch and device level ring (DLR) support
- Navigation button below the screen opens configurable navigation menus
- Seven screen size options: 7", 7 W", 9 W", 10", 12 W", 15", 19"
- Two USB hosts, one USB Device, one SD card
- c-UL-us listed; Class 1, Div 2, Groups A, B, C, D; KCC; CE (EMC); CE (LVD); RoHS; RCM
- NEMA and UL Type 12, 13, 4X, also rated IP66 as classified by UL; EAC, Marine

\* With V8 Firmware  
A Family- and Employee-Owned Company

## PanelView Plus 7 Performance Series B

- Hardware features
  - Operating system: Windows 10 IoT Core
  - Software: FactoryTalk View Machine Edition Station
  - CPU: Intel x86, 1.46 Ghz, dual core
  - RAM: 4 GB
  - System storage: 19.87 GB (~2GB available for user storage)
  - Web browser: Microsoft® Edge (HTML5 compatible)
- Stays consistent with Series A versions
  - Certifications
  - Panel cutouts
  - Accessories
  - Catalog numbers
  - List prices

**Runs applications developed on Series A without modifications!**

# FactoryTalk View SE Version 14.00

## RUNTIME MODERNIZATION

- SE Client rendering and scaling
- Runtime scale quality improvement
- Improved multi-touch interaction
- Runtime Navigation Menu
- Runtime Navigation Menu – Integrated Runtime Search
- Multi-language switching popups
- Multi-monitor display docking and sizing

## MOBILITY

- Step Line Trending
- Data Grid Time Range Filtering
- ViewPoint FactoryTalk® Administration Console refresh and modernization
- Enhanced System Status Portal
- System Status Portal – Alarm Dashboard

## APPLICATION DESIGN

- Radar Chart
- Built-in .NET Control integrating with Apache E-Chart Widgets
- Tag Browser UI
- Command button enhancements
- Custom user message for Toggle action
- New Data Log Pro with edge historian capability built on InfluxDB™
- FactoryTalk® View Studio: HMI Components filtering

## FEEDBACK-DRIVEN ENHANCEMENTS

- Electronic Signature for SE Functional Buttons
- Exclude tag scanning for invisible objects

## CONNECTIVITY AND VISUALIZATION

- Data Grid – FactoryTalk® Historian Data Source
- TrendPro & XY Plot Enhancements
- Show annotations on the TrendPro

## ALARMS AND EVENTS

- Language Switching Extended Tag Properties in alarm messages
- Alarm and Events Summary Live Data Value
- Additional Alarm and Events built-in functions

## AND MORE....

Revolutionary software for HMI, IIoT, and Industry 4.0 applications...

A new, **open**, scalable  
visualization platform with **options**

## 1 FactoryTalk® Optix Studio™

- Integrated Design environment for creating FactoryTalk® Optix™ Applications
- Design & test your HMI projects from a Windows desktop editor

## 2 FactoryTalk® Optix™ Application built by FactoryTalk® Optix Studio™

- **Project** – application logic, objects, communication parameters, etc.
- **Runtime** – runtime modules strictly necessary to run a specific application

(Local) Design and build of FactoryTalk® Optix™ Application

Local deploy of FactoryTalk® Optix™ Application

FactoryTalk® Optix™ Runtime

## 3 FactoryTalk® Optix™ Application is deployed to devices

- **Locally** from the computer hosting a local installation of FactoryTalk® Optix Studio™

## 4 FactoryTalk® Optix™ Runtime is running on devices

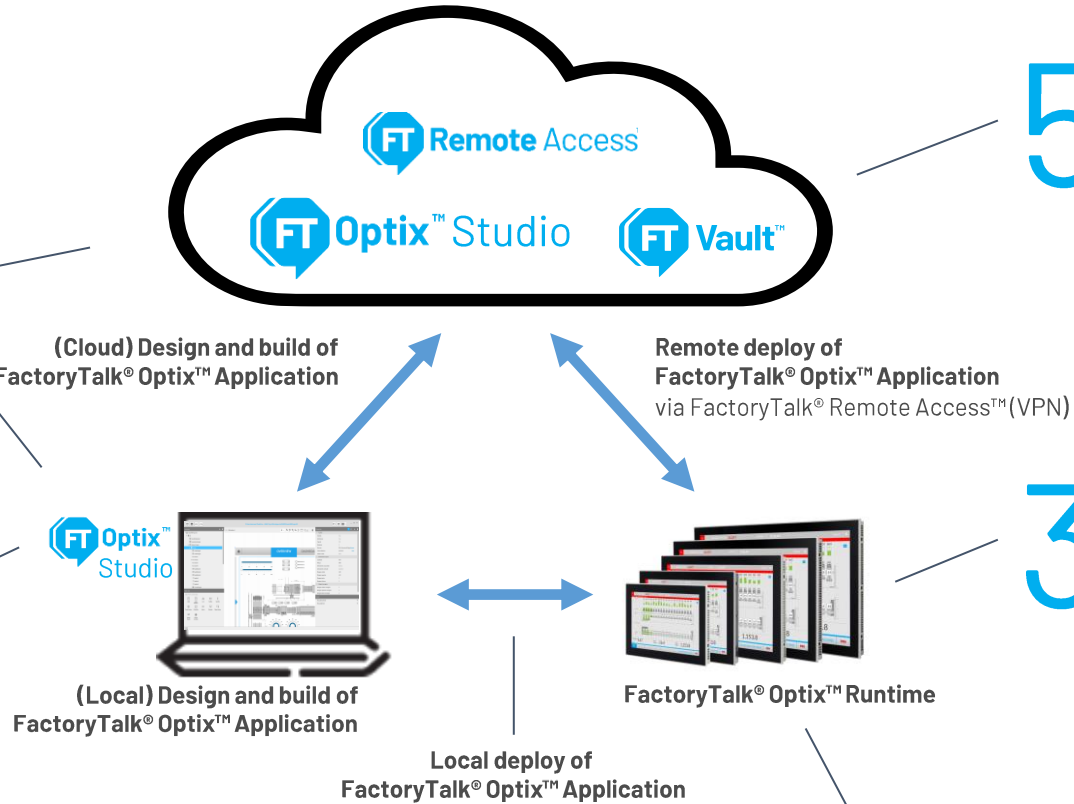

- Rockwell Automation® devices – open and closed
- 3rd Party PCs and devices
- Rockwell Automation® & 3rd party communications

## 1 FactoryTalk® Optix Studio™

- Integrated Design environment for creating FactoryTalk® Optix™ applications
- Design & test your HMI projects from a web browser or desktop editor

## 2 FactoryTalk® Optix™ Application built by FactoryTalk® Optix Studio™

- **Project** – application logic, objects, communication parameters, etc.
- **Runtime** – runtime modules strictly necessary to run a specific application

## 5 FactoryTalk® Hub™

- Design editor available in the cloud
- Project storage and retrieval in the cloud
- Open to third-party version control systems like GitHub in the cloud

## 3 FactoryTalk® Optix™ Application is deployed to devices

- Locally from the computer hosting a local installation of FactoryTalk® Optix Studio™
- Remotely from the cloud-hosted version of FactoryTalk® Optix Studio™

## 4 FactoryTalk® Optix™ Runtime is running on devices

- Rockwell Automation® devices – open and closed
- 3rd Party PCs and devices
- Rockwell Automation® & 3rd party communications

## FactoryTalk® Optix™

### Feature Highlights

#### Design options

Design & test your HMI projects directly from a web browser

Collaborative workflows allow modifications from anywhere, anytime

Version management tracks changes keeps track of who did what and when

Build project dynamically, by scripting, or even at runtime

#### Deployment options

Flexible host hardware

Panel • Station • Web Clients

Pay only for what you use

#### Graphic options

Responsive graphics

Reporting, dashboarding

Style sheets

Multi-language

#### Extensible options

Library management

Third-party drivers

IoT native connectivity

Full support of OPC UA companion specs

Open interface with C# scripting

## Build your HMI projects wherever you are

### Don't have FactoryTalk® Optix™ installed on your PC? No problem!

- Design, test, and deploy your HMI projects directly from a web browser using cloud-based FactoryTalk® Optix Studio™, available from FactoryTalk® Hub™
- Collaborative workflows allow modifications anywhere, anytime

### No internet connection? No problem!

- Install FactoryTalk® Optix Studio™ locally on your laptop
- Seamlessly transitions from browser to desktop app for disconnected editing and deployment

### Not sure which HMI device you'll be using? No problem!

- Build projects and deploy dynamically – even at runtime

## Create an application once...

 **Optix**  
Deployment options

### Deploy to any sized device

- Panel • Station • Web Clients
  - Including **OptixPanel™** and Logix **Embedded Edge Compute**
- ARM and x86 architectures
- Linux and Windows operating system
- Containers (demo mode/preview now)

### Scalable deployments to target devices

- What gets configured is the only content that gets deployed
- Pay only for what is deployed

### Choose any client type

- **Thick** client: Native FactoryTalk® Optix™ client
- **Web** client: Native HTML clients viewable from a web browser

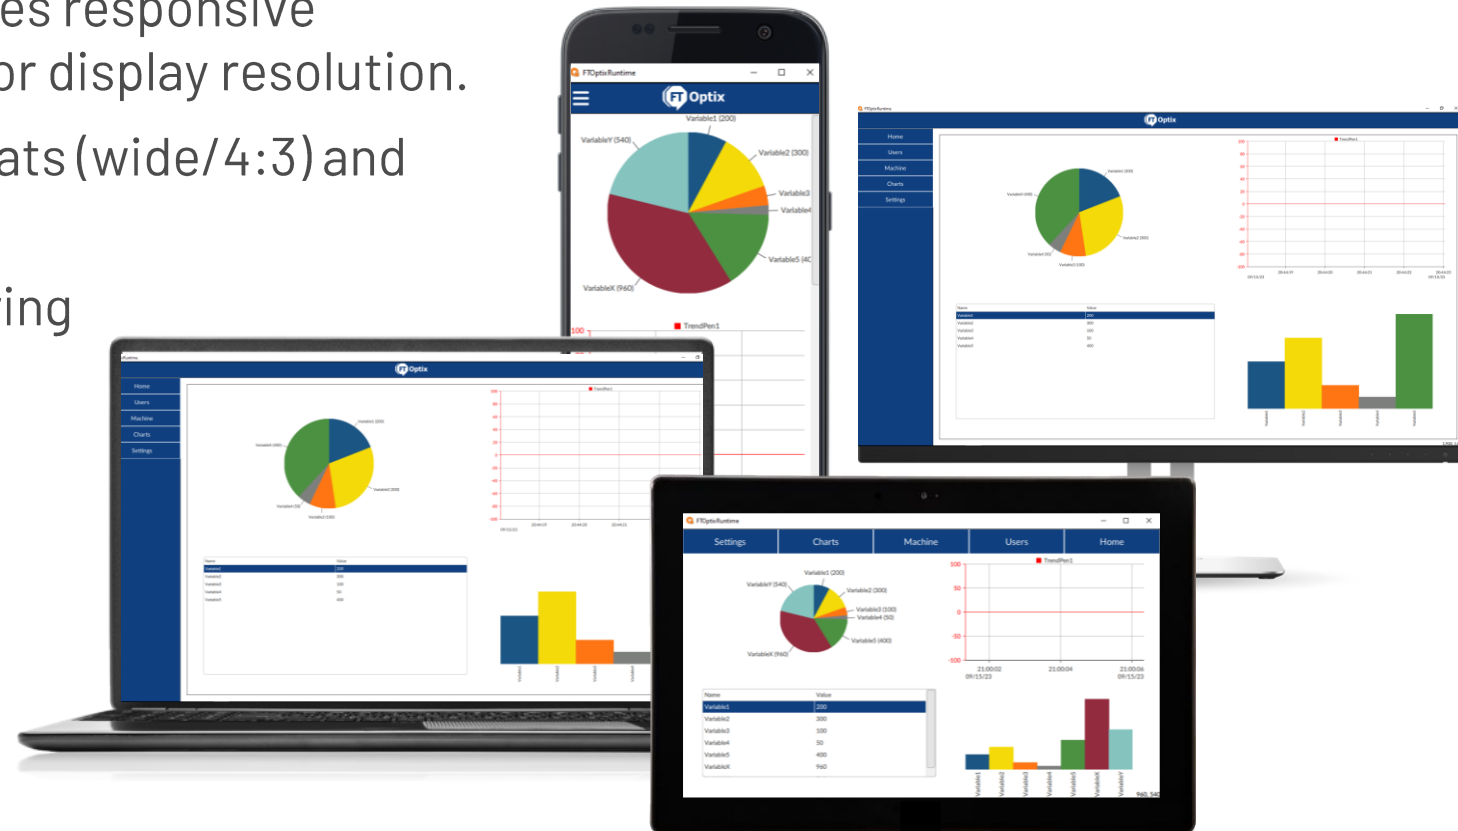

## Responsive displays

 **Optix**  
Graphic options

### Build a display once and view it on any piece of glass

- Relative positioning of the objects enables responsive interfaces adaptable to any form factor or display resolution.
- Automatically adaptable to various formats (wide/4:3) and resolutions (HD, Full HD)
- Identical native and HTML5 client rendering

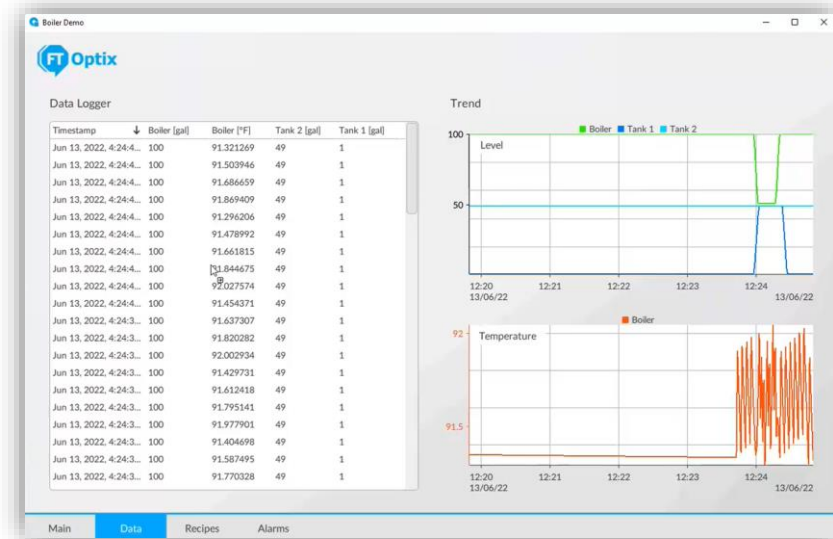

## Graphic options

# Logging, reporting and dashboarding

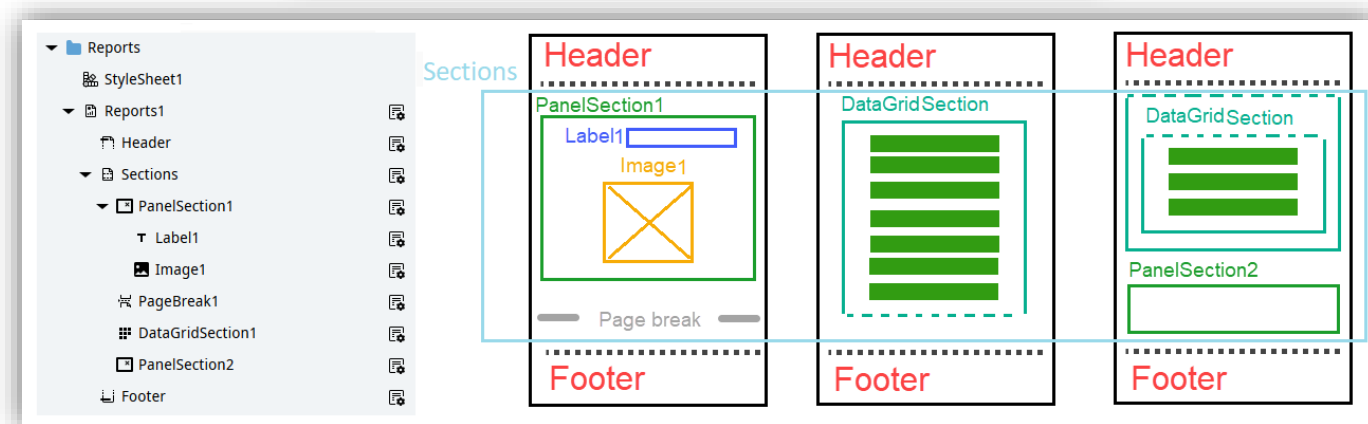

Simple database interface available for all components of the project

- Display historical or real-time data
  - Alarm history
  - Trending
  - Recipes
  - Data Grid
  - Text box control

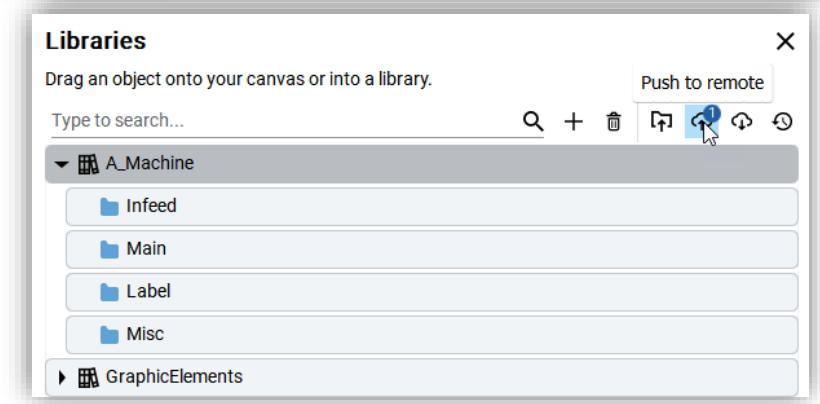

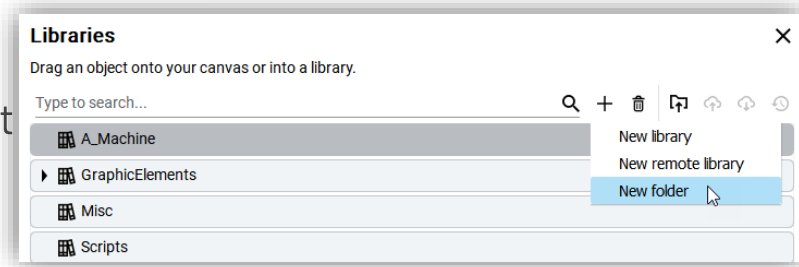

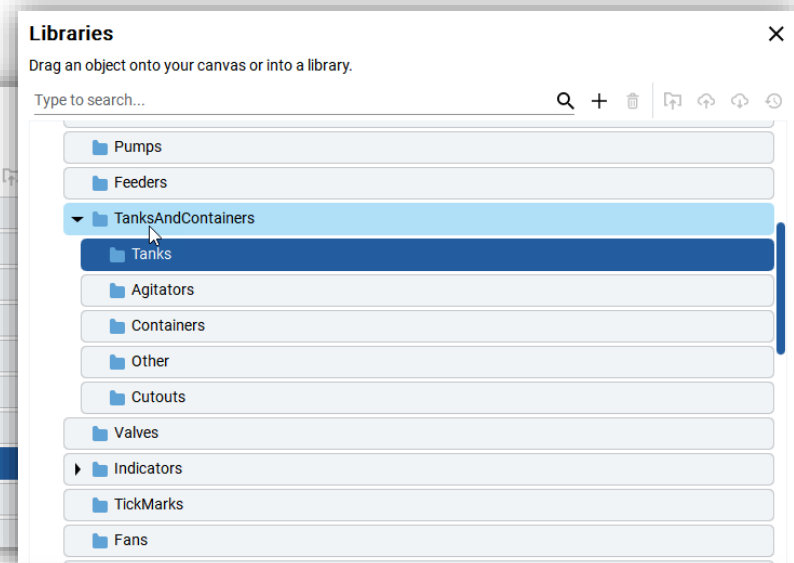

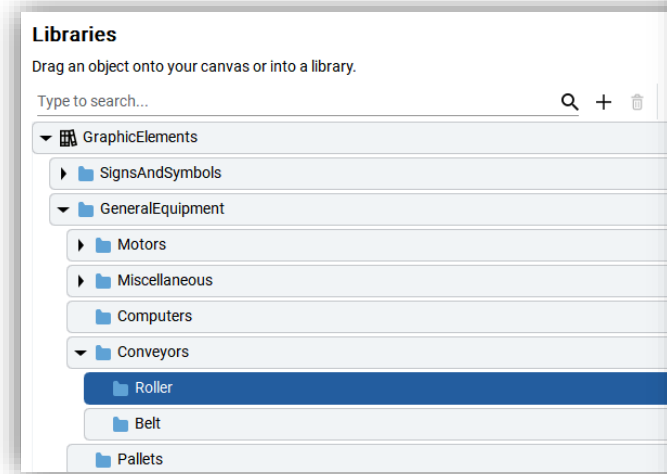

## Lightweight reports and dashboarding

- Customizable layouts containing text, tables, and static graphics.
- Live dashboards
- Automatically generated PDF reports

## Extensibility, reuse and management made simple

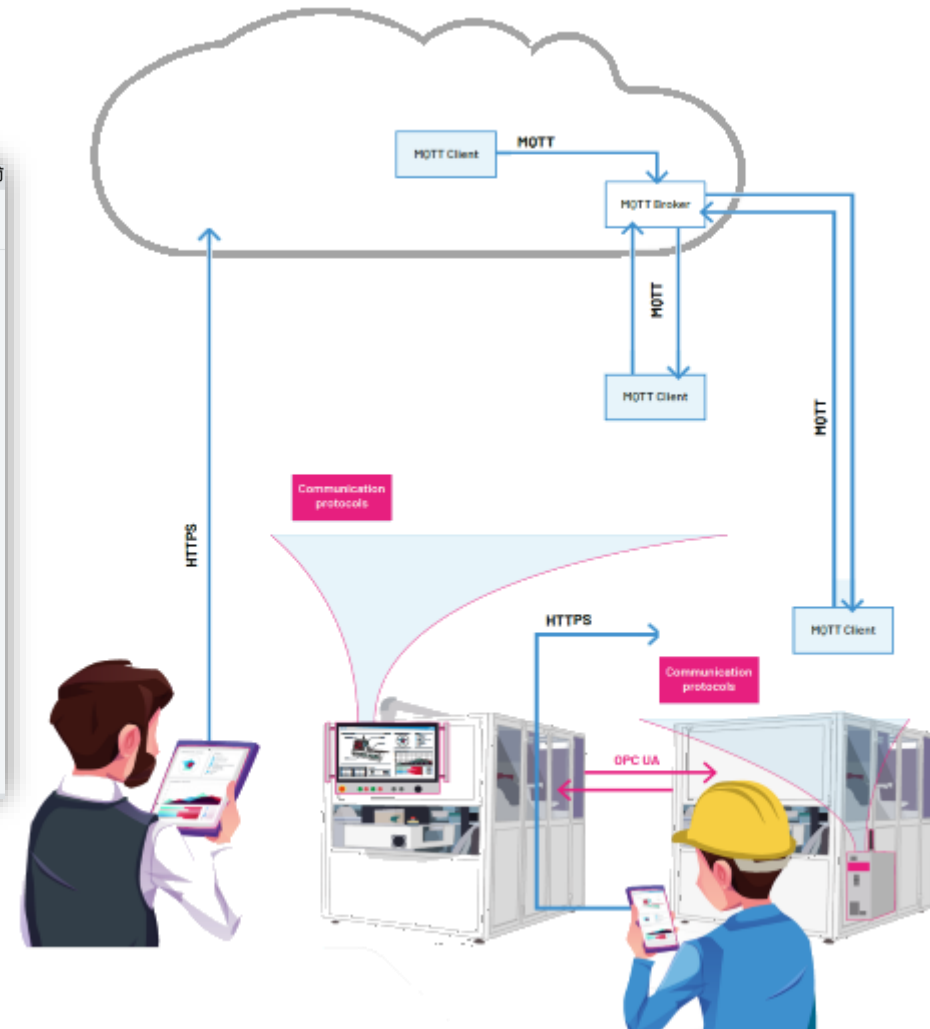

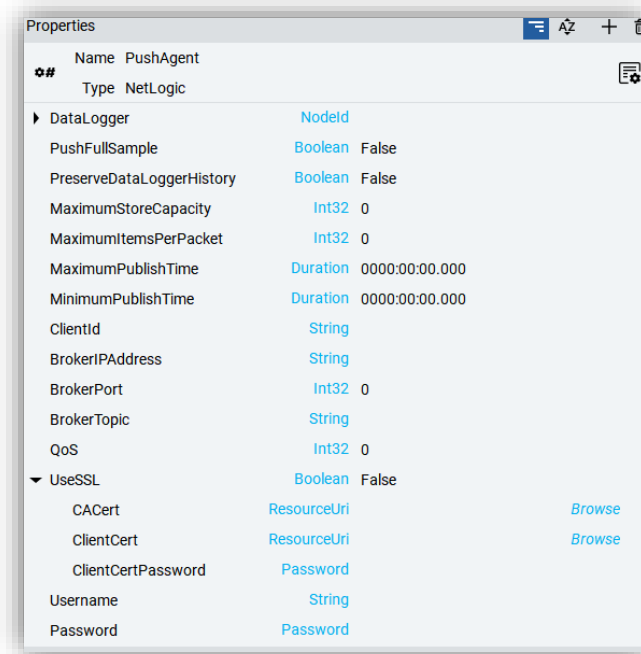

- 1,000s of graphical objects
- Industry standard objects
- Search to quickly find and filter objects
- Logical folder organization
- Reuse made easy – drag n drop
- Rockwell Automation standard libraries
- User-defined libraries
  - Save single object or complete project
- Library Management Options
  - Save Local or Remote
  - Multi-user collaboration helps manage library standards with plant engineering, OEMs and Integrators
    - Commit, Push, Pull, History

## Built-in reliable connectivity – from the controller to the cloud

- Preferred Rockwell Automation connectivity
- IoT and IIoT connectivity (MQTT)
- Secure HTTPS protocols
- Native OPC UA protocols
- Native third-party drivers included

- ☑ RA EtherNet/IP Driver
- ☑ CODESYS Driver
- ☑ MELSEC Q driver
- ☑ MELSEC FX3U Driver
- ☑ Modbus Driver
- ☑ OMRON EtherNet/IP driver
- ☑ OMRON Fins Driver
- ☑ S7 TIA PROFINET driver
- ☑ S7TCP driver
- ☑ Serial port
- ☑ TwinCAT driver

## Open interfaces with scripting capabilities

 **Optix**  
Extensible options

### Unlimited customizations and automatic generation

- Open API available to all aspects of a project available by C# scripting
- Create application logic for customized functionality
- Automatically generate parts of the project at design time and runtime
- Customize the visual style of graphics instantly

```
public void Configuration() {  
    // Read number of FAN to be set  
    var numberFanExisting = Project.Current.GetObject("Run  
  
    // Read variable indicating the number of FAN  
    var numberFun = Project.Current.GetObject("Model/Proto  
  
    // Execute for the number of FANS to create  
    if (numberFun - numberFanExisting > 0) {  
        for (int i = numberFanExisting + 1; i <= numberFun  
        // Create object of type FAN and insert in the  
        var modelloFan = InformationModel.MakeObject<F  
        modelloFan.Number = i;  
        Project.Current.GetFolder("RuntimeObjectUI")
```

## Only pay for what you need

Runtime licenses aligned to your specific requirements

### Typical Applications

	X-Small	Small	Medium	Large	X-Large
Examples Only	<p>Controller connectivity acting OPC UA server and basic display</p> <ul style="list-style-type: none"> <li>• Single controller (Rockwell Automation®)</li> <li>• OPC server (1 connected client)</li> <li>• Data Logging with local DB</li> <li>• HMI graphics</li> </ul>	<p>Basic HMI including capabilities of XS plus:</p> <ul style="list-style-type: none"> <li>• 3<sup>rd</sup> party controller support</li> <li>• Alarming</li> <li>• Basic Reporting</li> <li>• Security w/ Active Directory</li> </ul>	<p>HMI station including capabilities of S plus:</p> <ul style="list-style-type: none"> <li>• Multiple controller (Rockwell Automation® or 3<sup>rd</sup> party)</li> <li>• Recipes</li> <li>• OPC UA Client</li> </ul>	<p>Comprehensive HMI including capabilities of M plus:</p> <ul style="list-style-type: none"> <li>• HTML5 HMI up to 3 web clients</li> <li>• Audit signatures</li> <li>• Database - ODBC w/ 1 db connection</li> </ul>	<p>HMI with extensibility including capabilities of L plus:</p> <ul style="list-style-type: none"> <li>• Multiple OPC UA Client connections</li> <li>• OPC UA Server for multiple clients</li> <li>• DB - ODBC, multiple db connections</li> </ul>

Unlimited station runtime also available

Flexible packaging: You can exchange capabilities shown in the examples above for specific capabilities you need

# OptixPanel™ Compact

Runtime options

- The embedded hardware solution optimized for FactoryTalk® Optix™

OEM focus – small machines, simple applications

- Specifications
  - Wide display sizes\*: 4.3" and 7"
  - Resistive and PCAP touch
  - FactoryTalk® Optix™ Runtime **Small** (8 feature tokens)
  - FactoryTalk® Remote Access™ Runtime **Basic**
- Optional License Upgrade
  - FactoryTalk® Optix™ Runtime Medium (11 feature tokens)
  - FactoryTalk® Remote Access™ Pro

**Embedded Hardware with FactoryTalk® Optix™ Runtime**

# OptixPanel™ Standard

## Runtime options

- The embedded hardware solution optimized for FactoryTalk® Optix™

OEM focus – midrange machines and applications

- Specifications

- Wide display sizes\*: 7", 10.1", 12.1", 15.6", 18.5", 21.5"
- 4:3 display sizes\*: 10.4", 12", 15"
- Resistive and PCAP touch
- FactoryTalk® Optix™ Runtime **Medium** (11 feature tokens)
- FactoryTalk® Remote Access™ Runtime **Pro**

- Optional License Upgrade

- FactoryTalk® Optix™ Runtime Large (15 feature tokens)

Embedded Hardware with FactoryTalk® Optix™ Runtime

## Embedded Edge Compute Module

 **Optix**  
Runtime options

Scaled to meet wide range of customer needs:

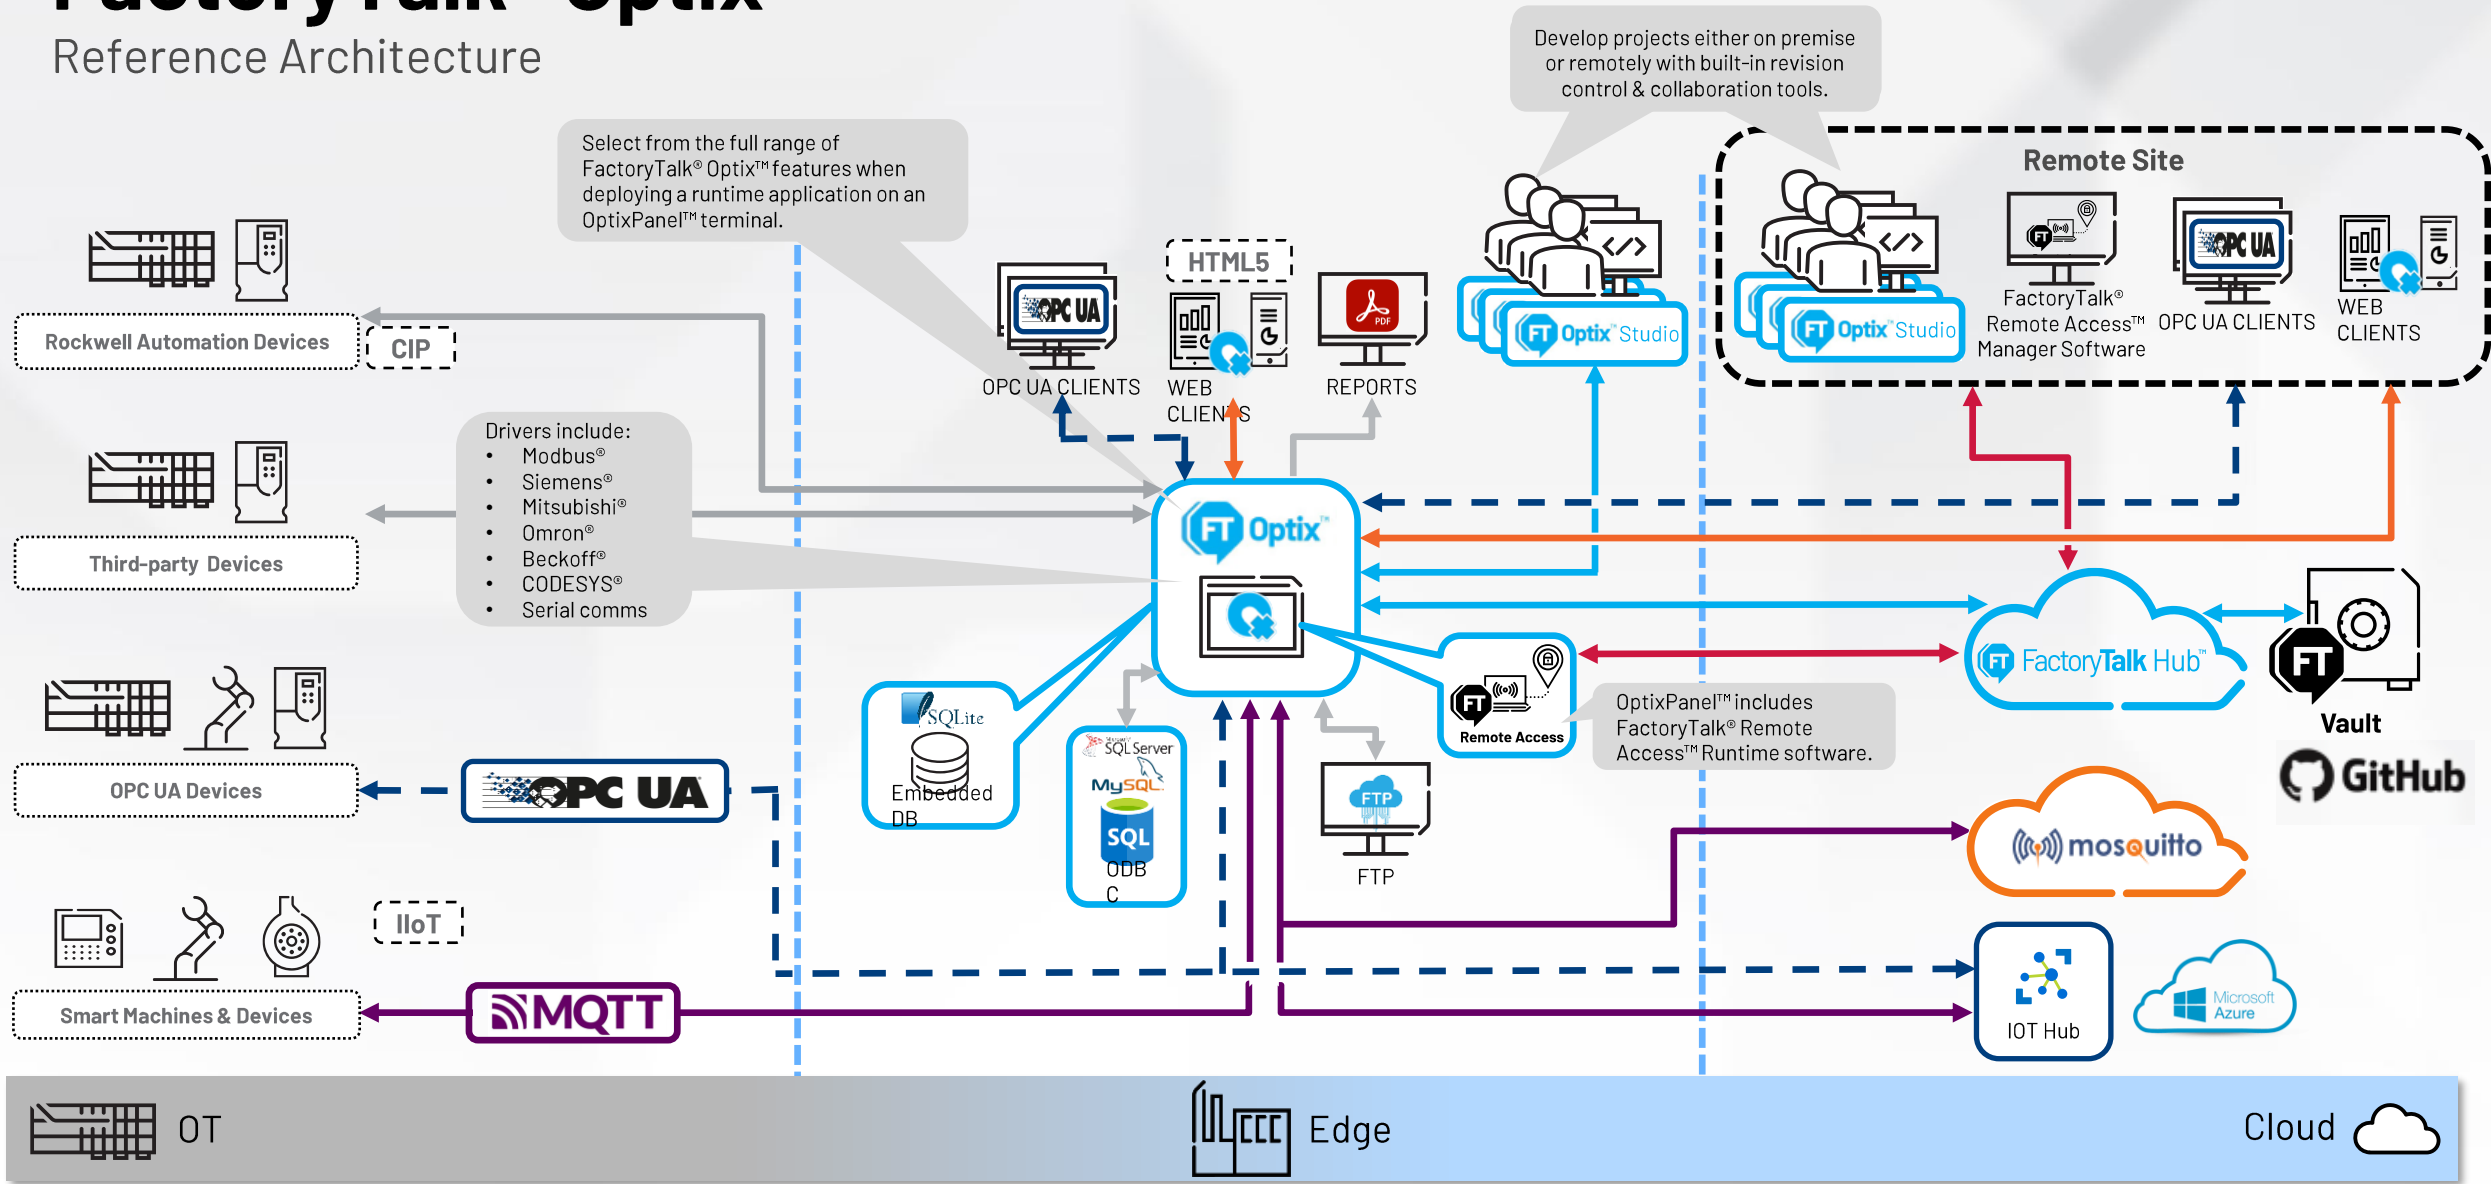

- OEM and End User – Simple to complex Machines and Applications
- Includes
  - FactoryTalk® Optix™ Runtime **Extra-Small (XS)**
  - FactoryTalk® Remote Access™ Runtime **Pro**
  - Optional License Upgrade to FactoryTalk® Optix™ Runtime (Small, Medium or Large)
- Value
  - Close proximity of data to computing – Save and analyze larger amounts of data in real time at the machine yielding more informed decisions
  - Reduced storage costs – Analyze data right where it originates and local data can be pre-processed to be more efficiently sent to the cloud.
  - Access control management – Control of what data is processed close to the machine. Store and analyze machine data close to automation layer.

**Embedded Hardware with FactoryTalk® Optix™ Runtime**

Flexibility

# ASEM 6300 Portfolio

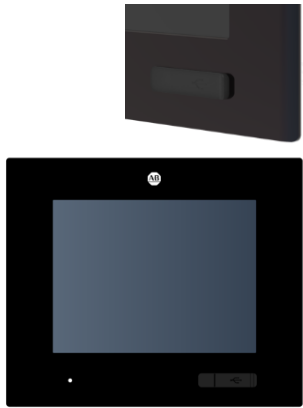

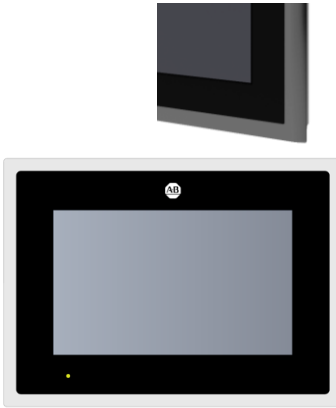

## ASEM™ 6300P Panel PCs

- Screen sizes from 12" to 24"
- Wide screen or 4:3 aspect ratios
- Resolutions up to Full HD: 1920x1080
- Stainless steel IP69K version available
- Allen-Bradley® branded or brandless
- Processor options: Celeron, i3, i5 or i7
- Memory options from 4GB to 32GB
- Fanless design for increased reliability
- SSDs with up to 1TB each
- With Windows or no OS preinstalled
- One PCIe slot for expansion in the field
- Multiple USB ports
- ThinManager-ready BIOS

**Over 2,000  
variants available**

## The ASEM™ 6300P family of industrial panel PCs

			
Aluminum with USB Standard (IP65)	Aluminum with USB Widescreen (IP65)	IP69K Stainless Steel	Aluminum-Glass PCAP (IP65)
IP65	IP65	IP69K	IP65
12" and 15" (1024x768 4:3) 17" and 19" (1280x1024 5:4)	15.6, 18.5", 21.5", 24" (FHD)	12.1" (1280x800 16:10)	15.6, 18.5", 21.5", 24" (FHD)
Analog Resistive			PCAP
Allen-Bradley® branded			Brandless option

## ASEM™ 6300B Box PCs

- Packaging options
  - Sub-compact DIN rail mount or book mount
  - Modular iClass book mount with PCIe expansion with optional cooling fan
  - Wall mount iClass with PCIe expansion and optional cooling fan
  - Desktop / tower
- Highly configurable
  - Processor options: Atom x5, Atom x7, Celeron, i3, i5 or i7
  - Memory options from 4GB to 32GB
  - Most versions are fanless design for increased reliability
  - One or two SSDs with up to 1TB each
  - With Windows or no OS preinstalled
  - One or two PCIe slots for expansion in the field
- ThinManager® Ready BIOS
  - Four serial & USB COM port options
  - Additional ethernet port
  - Additional display ports (two)
  - CFast options
  - Remote Video Link (RVL)
  - ATX power option
  - Trusted Platform Module (TPM) options

**Almost 5M variants  
available**

## ASEM™ 6300B-JB1

New iClass compact book mount box PC

- Celeron, i3, i5 or i7 processors
- Two or four DisplayPort connectors
- Four USB connectors
- Audio line in and line out
- RS-232 serial port (four display only)
- ThinManager-Ready BIOS
- Windows 10 LTSC 2021
- Trusted Platform Module (TPM) option
- Storage options from 0B to 2TB
- RAM from 4GB to 32GB
- Future enhancements
  - Wi-Fi and cellular 5G options
  - Thin-client version

## ASEM™ 6300P-EW1 & ASEM™ 6300B-EW1

Upcoming Atom-class panel PC and box PC

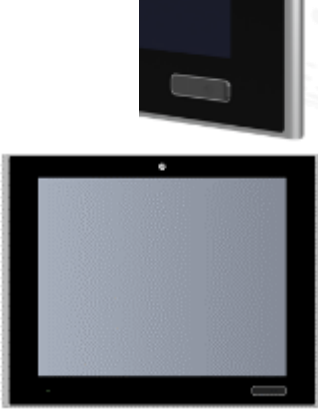

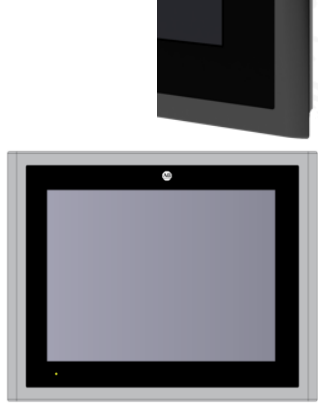

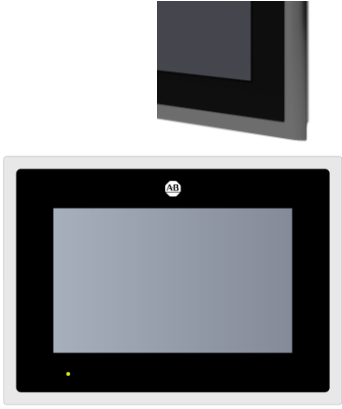

- Cost-effective, entry-level IPCs for lower-end applications
  - Elkhart Lake Intel Atom® x6425E
  - RAM: LPDDR4 up to 16 GB
  - Storage: M.2 SSD PCIe NVMe, SSD/HDD 2.5", or CFast
  - OS: Windows 10 IoT Enterprise 2021 64 bit
- Built-in
  - 4x USB 3.1 Gen2 (10Gbps)
  - 2x Ethernet 1Gbps
  - 1x Ethernet 2.5Gbps
  - 1x DisplayPort++
  - 1x DB9M multi std isolated serial port
- Optional
  - 2x USB
  - 1x Ethernet 1Gbps + 1x USB
  - 1x Ethernet 1Gbps
  - 1x RVL
  - 2x DB9 multi std isolated serial port
- Paired with our collection of front panels
  - 4:3 Aluminum and Aluminum TrueFlat from 10.4" to 19"
  - Wide screen Aluminum, TrueFlat and Aluminum & Glass PCAP from 12.1" to 24"

**AFC March '24**

Allen-Bradley® branded					Brandless option
AC & DC option for all sizes; Native long-distance option					

## Remote Video Link (RVL)

- Remote your RVL-compatible monitor up to 100m from your RVL-compatible IPC
- Purchase units with integrated RVL or use RVL transmitters and/or receivers

## ASEM™ 6300T Thin Clients

Compact and cost-effective connections to ThinManager® systems

- Atom class processor
- ThinManager-ready BIOS 
- Single or dual DisplayPort connections with 4K resolution
- 4GB or 8GB of RAM
- Two RJ45 Ethernet connections
- Book mount or DIN rail mount
- No local storage
- Standard Allen-Bradley® branding
- Single board design with all components soldered to the board for great resistance to shock and vibration
- Extremely compact form factor

## **ASEM™ 6300PA On-Machine™ Panel PCs – *Now available***

- VESA 75/100 mounting
- 15.6", 18.5", 21.5" and 24" wide 16:9 aspect ratio
- Full HD TFT LED backlight LCDs
- Aluminum and glass True Flat projected capacitive multitouch-screen front panels
- Portrait or landscape formats
- Intel Celeron, Core i3 and i5 processors options
- 4GB or 8GB of RAM and up to 512GB SSD storage
- Windows 10 IoT 2019 LTSC or No OS
- Optional long-distance Remote Video Link (RVL)
- Configurable Button Area for the installation of Ø22 hard-wired elements
- ThinManager-ready BIOS

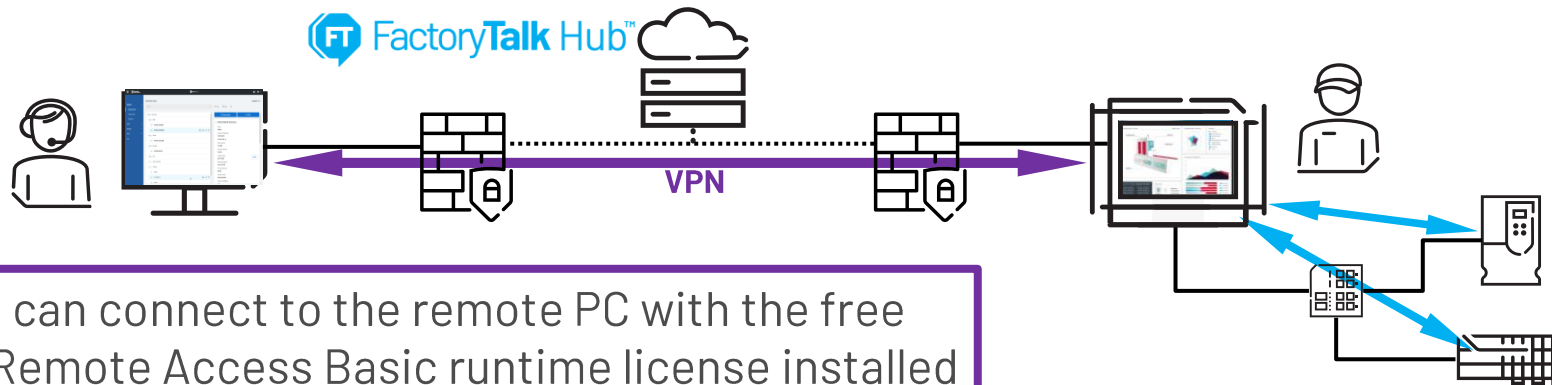

**6300MA on-machine monitors will be AFC by end of CY23**

Now included in the purchase of any ASEM 6300 PC!

## FactoryTalk® Remote Access™ Basic runtime license

- [FactoryTalk® Remote Access™](#) delivers secure communications over the internet to enable performance and security for on-demand remote assistance, installation, programming, troubleshooting, and maintenance of any remote automation system and application
- The FactoryTalk Remote Access Runtime Basic enables you to register your ASEM 6300 in FactoryTalk Remote Access Manager, a subscription software available in FactoryTalk Hub
- The free Basic runtime is available for all ASEM 6300 box PC, panel PC and on-machine PCs – including those already purchased and installed in the field

You can connect to the remote PC with the free FT Remote Access Basic runtime license installed

When you upgrade to FT Remote Access Pro, you can connect through the remote PC to devices like controllers and drives

Download release 13.6 or later from the [Product Compatibility and Download Center \(PCDC\)](#)

1

## FactoryTalk® Remote Access™ Manager

A web-based client used to maintain and initiate remote connections:

- Allows management of account, users and permissions, and device registration
- Activates VPN for remote connectivity

2

## Remote Access Endpoint

- FactoryTalk® Remote Access™ Runtime
- Stratix® 4300 Remote Access™ Router
- OptixPanel™ Graphic Terminal
- Embedded Edge Compute™ Module
- ASEM™ 6300 Industrial PC

Select the endpoint that works best for your application.

# FactoryTalk® Remote Access™ Endpoint: **Stratix® 4300**

- Remote access to devices connected via Gigabit Ethernet, serial interfaces, Wi-Fi and/or cellular
- Quick and easy installation to existing remote networks where a runtime cannot be installed and/or a physical separation between the automation subnet (LAN) and the enterprise network (WAN) is required
- First-time configuration via local Ethernet port or USB
- Routing and NAT (1-to-many and 1:1) functionality
- Remote management via FactoryTalk® Remote Access™ Manager
- Protection against unauthorized domain modification
  - Router remains connected to original configured domain after factory reset to help protect against malicious activity
- Hardware commands and digital I/O
  - Can be used to allow or deny remote connectivity at the local machine
