

**Our Vision**

**Our Focus**

**Our Partners**

## Agenda:

- ❖ **Signify & Schaedler!**  
*yesco*
- ❖ **Global & Industry Trends**
  - ❖ Market drivers & Disruptions
  - ❖ Science and Technology
- ❖ **Innovation Highlights**
- ❖ **Open Q&A**

the meaning of light

Our **purpose** is to unlock the **extraordinary potential** of light for **brighter lives** and a **better world**.

Our **goal** is to become the undisputed leader in **sustainable, connected** lighting solutions, as recognized by our customers.

**Schaedler Yesco Distribution**, established in 1924, is a provider of complete **connected** solutions for the electrical industry.

With 23 locations throughout Pennsylvania and New York, the company offers services and solutions for **lighting, datacomm, automation**, and **industrial** needs.

As a family- and employee-owned company, we understand that business is about more than having the right products. It's about **integrity, reliability, and expertise**. With nearly a century of industry knowledge, an impressive roster of professional certifications, and lots of in-the-field job experience, our team has the practical know-how to help our customers overcome challenges, make educated choices, and experience successful outcomes.

# Global & Industry Trends

We have become  
the indoor generation

On average, we spend more  
than **90%** of our time indoors

Companies increasingly realize that investing in the **Health & Wellbeing of their employees** is the best investment in their business

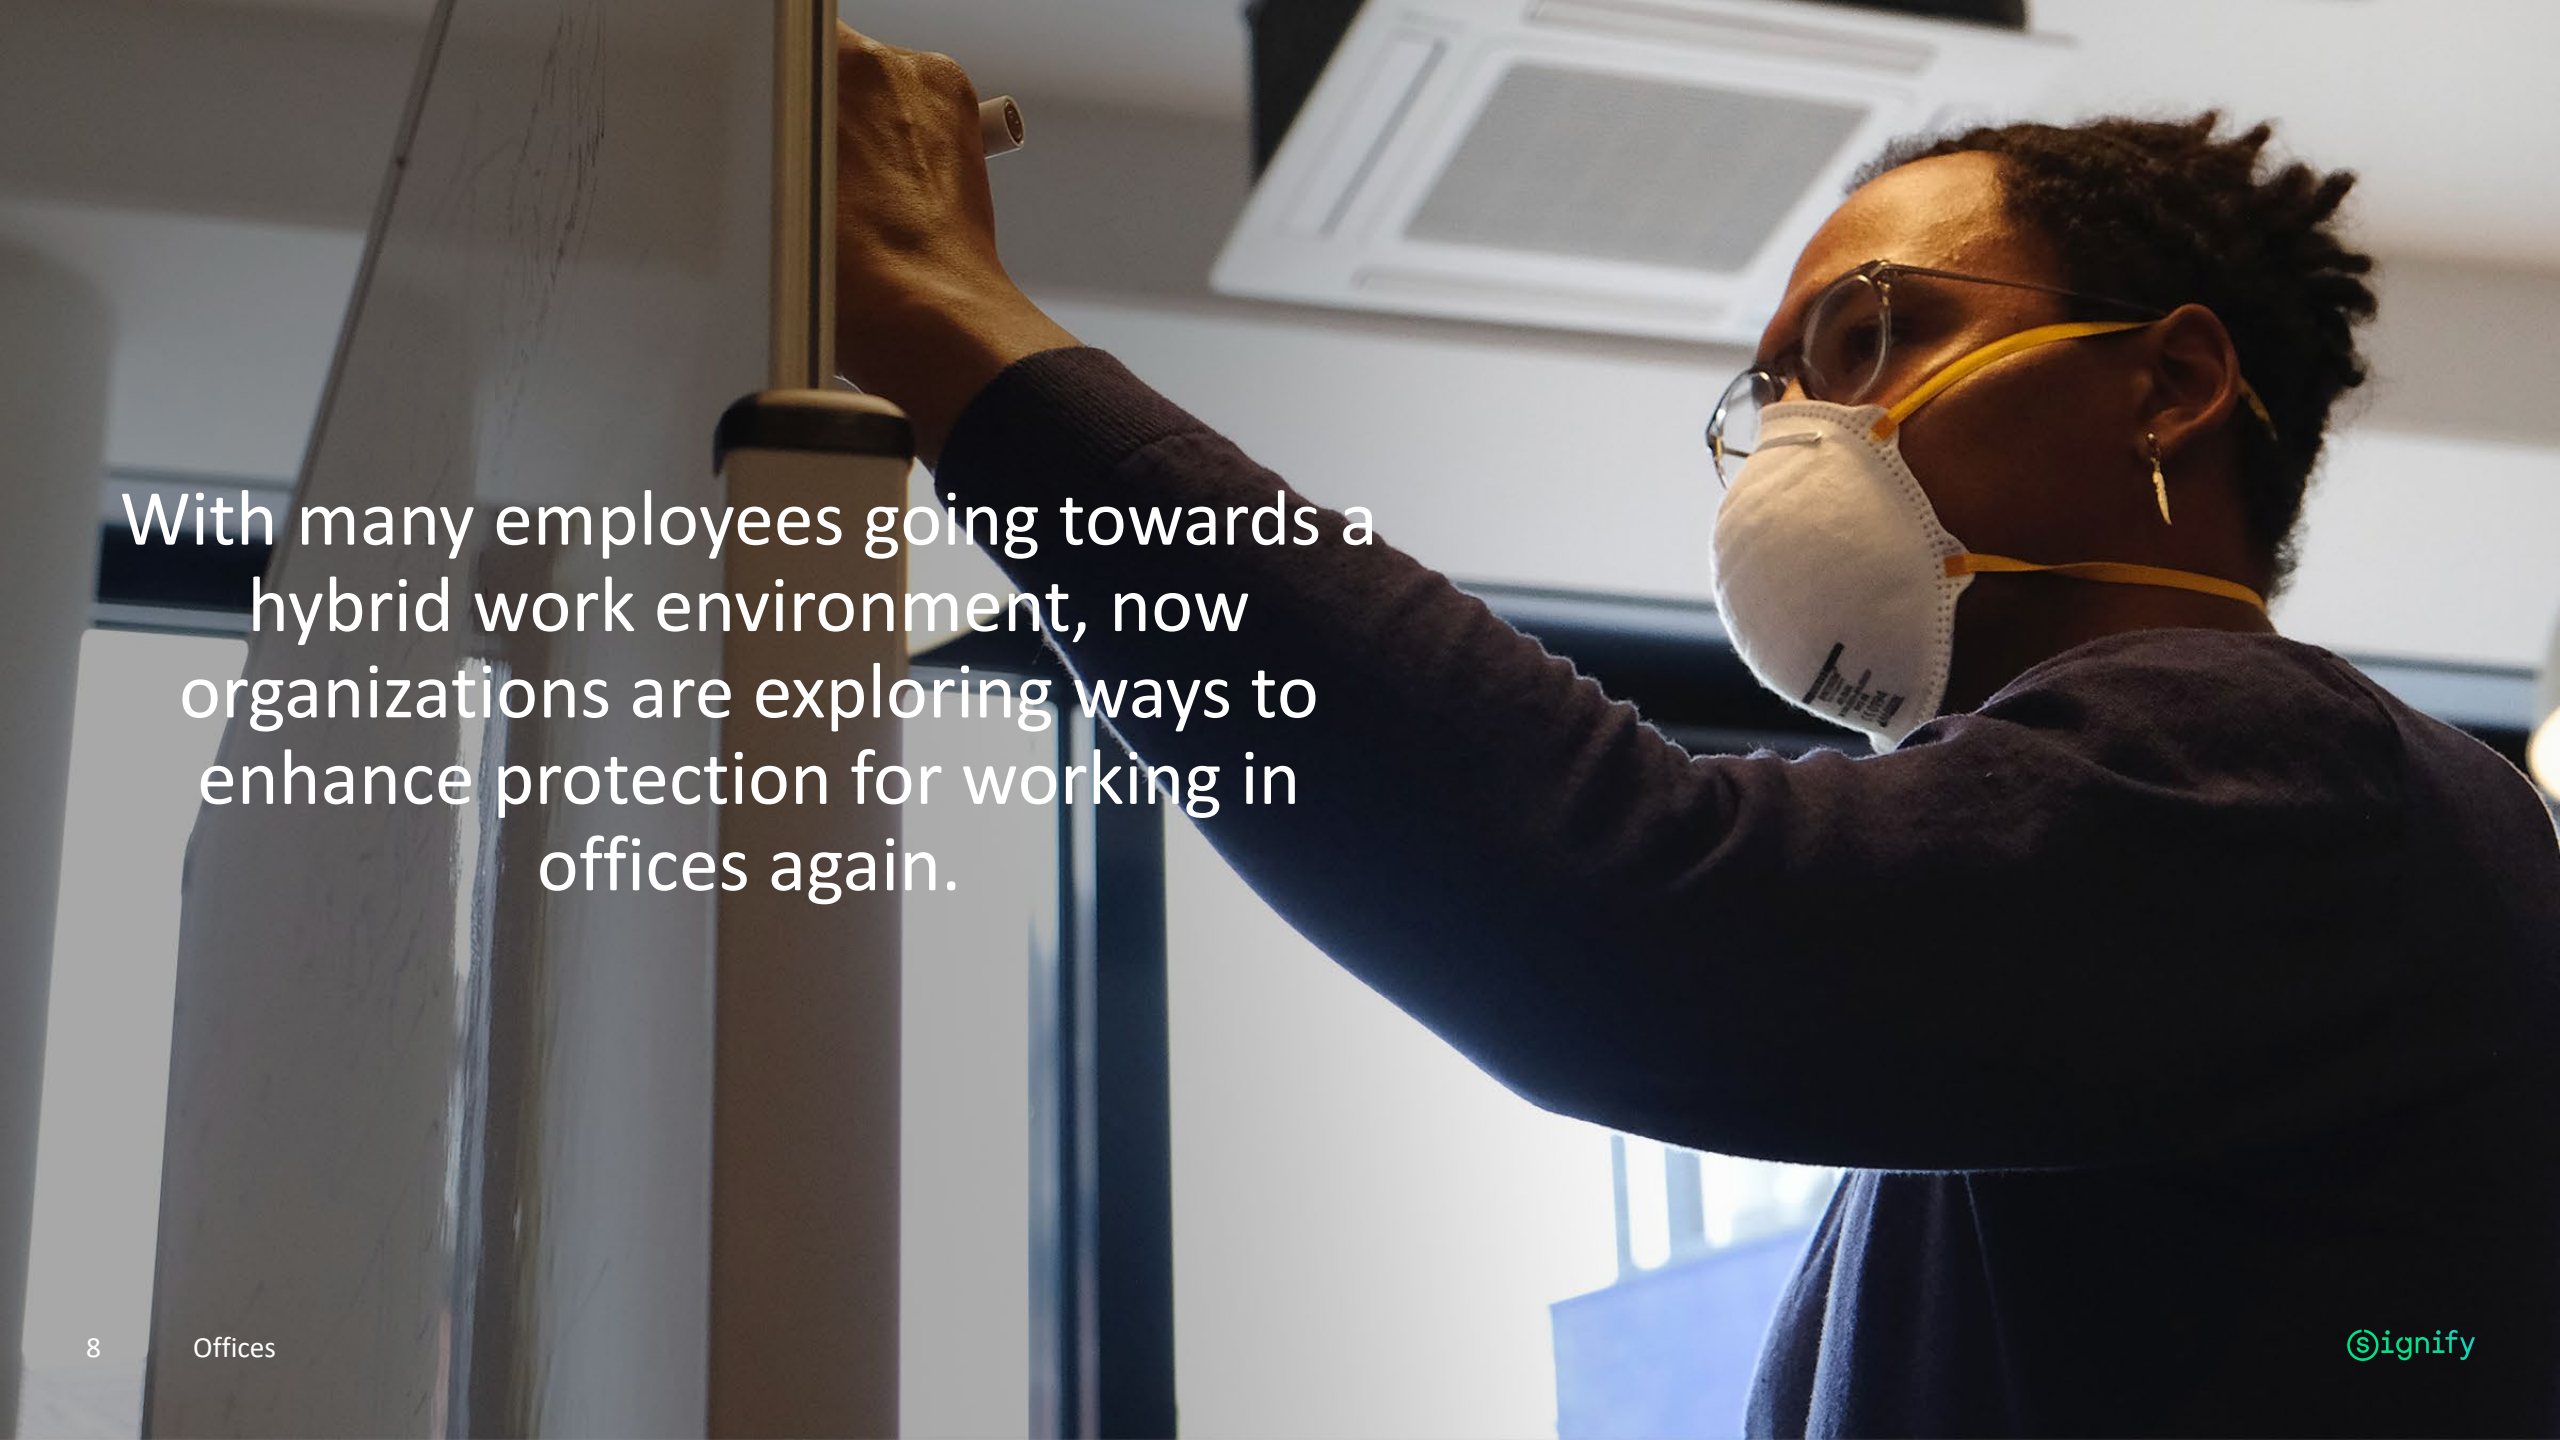

**1%**  
for energy

**9%**  
for rent

**90%**  
for employees

A person with short dark hair, wearing glasses and a white face mask, is writing on a whiteboard. They are wearing a dark blue long-sleeved shirt. The background shows an office environment with a ceiling light fixture and a window. The text is overlaid on the left side of the image.

With many employees going towards a hybrid work environment, now organizations are exploring ways to enhance protection for working in offices again.

# Wall Street Journal Video

3/18/2021 1:10PM

## How Risky Is the Classroom With Covid-19 Controls in Place?

A year into the coronavirus pandemic, many schools are only partially open for fear they could fuel the spread of the virus. Experts explain what the actual risks are for spreading Covid-19 in schools and how proper controls can change that equation. Illustration: Preston Jessee for The Wall Street Journal

### Video Link:

# Many aspects of human physiology and behavior are dominated by 24-hour rhythms

Parameters that determine the biological effect :

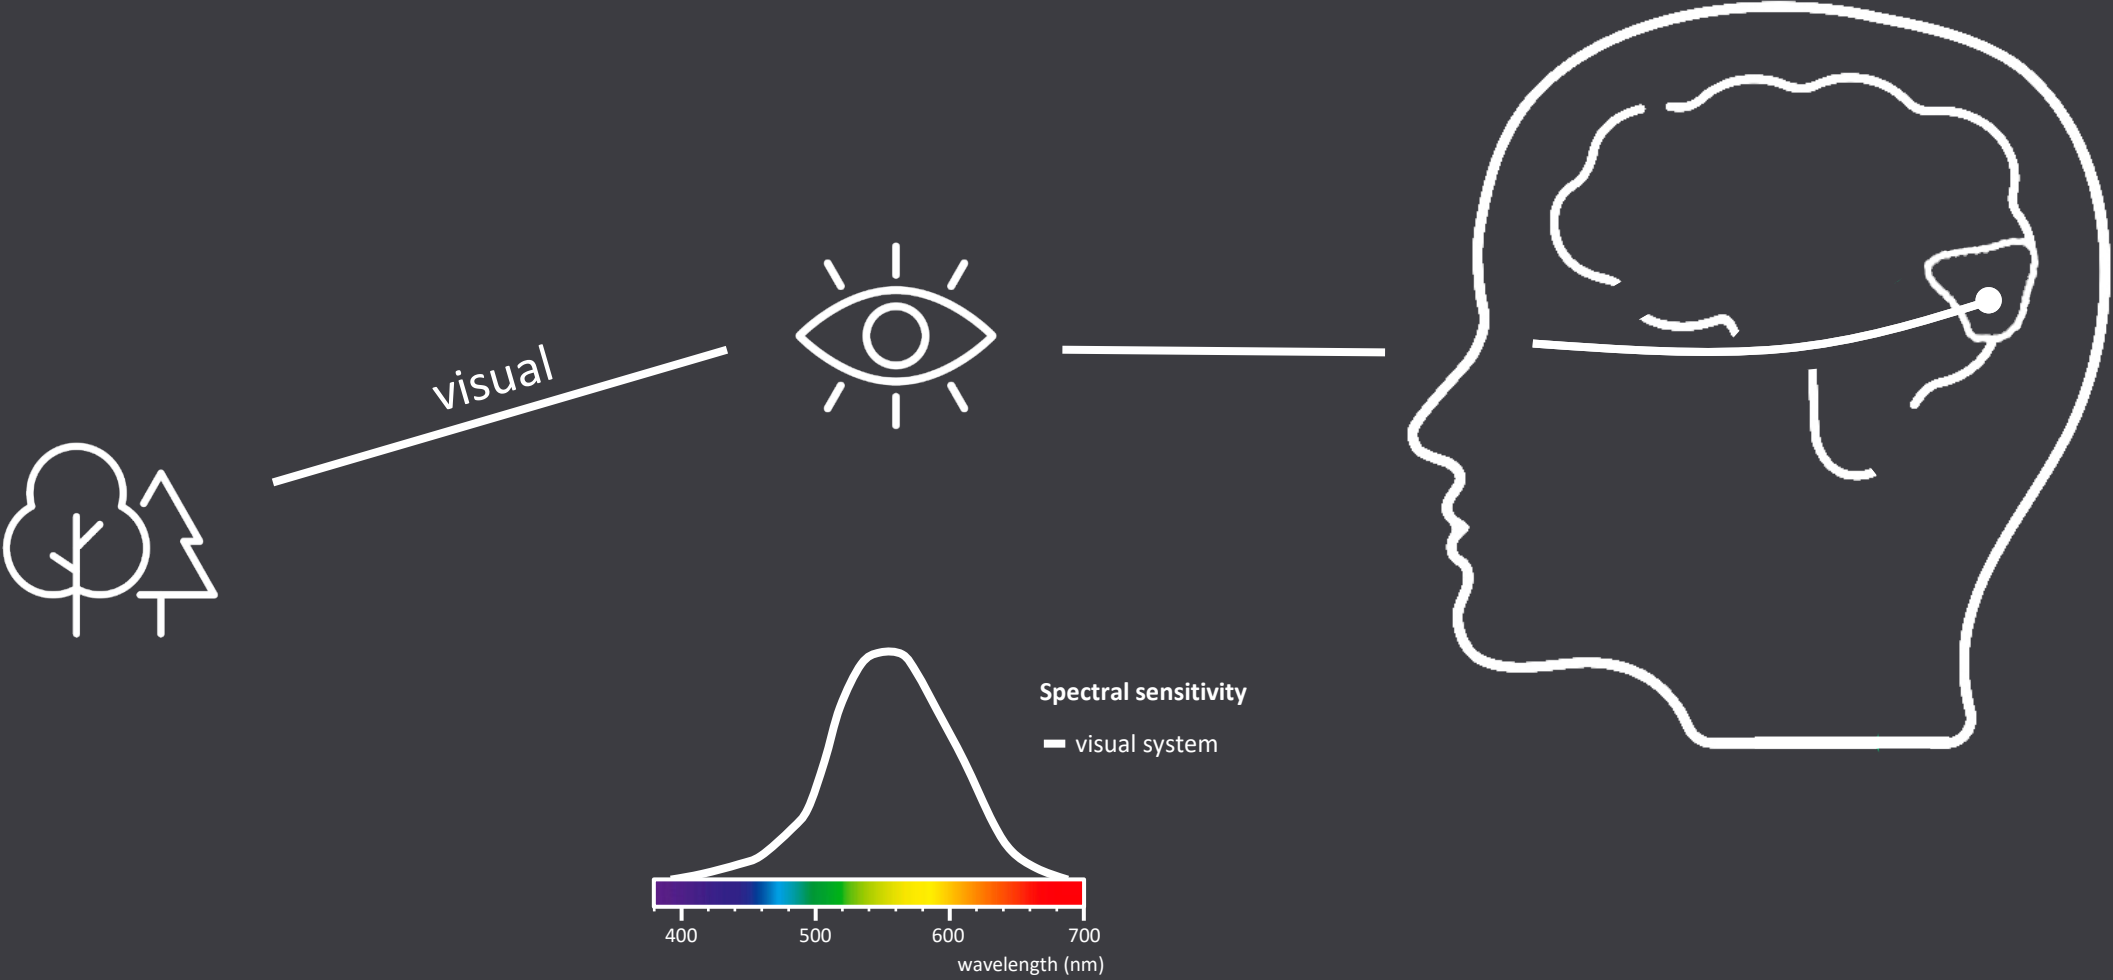

- Light intensity
- Light spectrum
- Light distribution
- Time of day
- Duration

Biological function better

# Light enables us to see better...

# Light enables us to see better, function better and feel better

Source: Mignot et al. Nature  
2002, Taillard et al. Elsevier  
25-43, 2012

# Evidence

## Providing a view to the sky

Access to natural light and views of the outdoors are the **#1** attribute of the workplace environment.

**47%** of employees admit they feel tired or very tired from the absence of natural light or a window at their office.

1614 office employees interviewed, "The Employee Experience", Future workplace, 2016

Research with 200 office workers shows improvements for those who had the best possible view versus those with no view:

- **Up to 25%** mental function and memory improvement
- **Up to 12%** call processing increase
- **Up to 23%** productivity increase

Heschong et al., Windows and offices: a study of office worker performance and the indoor environment, California Energy Commission, 2003

Up to  
**12%**  
Call processing  
increase<sup>2</sup>

Up to  
**23%**  
Productivity  
increase<sup>3</sup>

# Evidence

## Being immersed in nature

Biophilic design reduces stress, improves cognitive function and creativity and is essential for providing opportunities to live and work in spaces with greater overall health and wellbeing.

Browning et al., 14 Patterns of Biophilic Design, Terrapin Bright Green, LLC, New York, 2014

Being immersed in (artificial) nature leads to the following benefits:

- **Positively impacted cognitive performance**  
Mehta, Zhu & Cheema, 2012; Ljungberg, Neely, & Lundström, 2004
- **Emotional restoration, with lower instances of tension, anxiety, anger and fatigue**  
Alcock et al., 2013; Barton & Pretty, 2010; Hartig et al., 2003; Hartig et al., 1991
- **Positively impacted attitude and overall happiness**  
Barton & Pretty, 2010

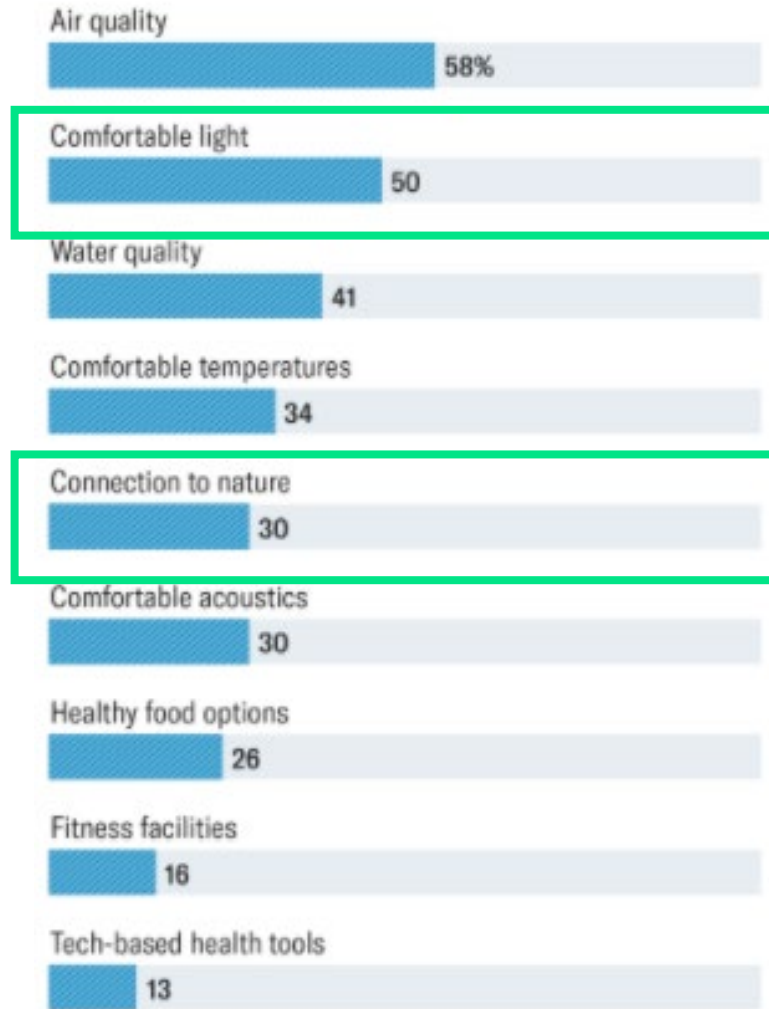

# Harvard Business Review confirms that comfortable light and outdoor views are key for improved Health & Wellbeing

A survey of 1,600 workers reveals that 'Comfortable light' and 'Connection to nature' are in the top-5 of Workplace Wellness Perks. They matter much more than tech-based health tools according to Harvard Business Review.

Source: Workspace survey: What employees want most for their workspaces, JC. Meister, HBR 2019

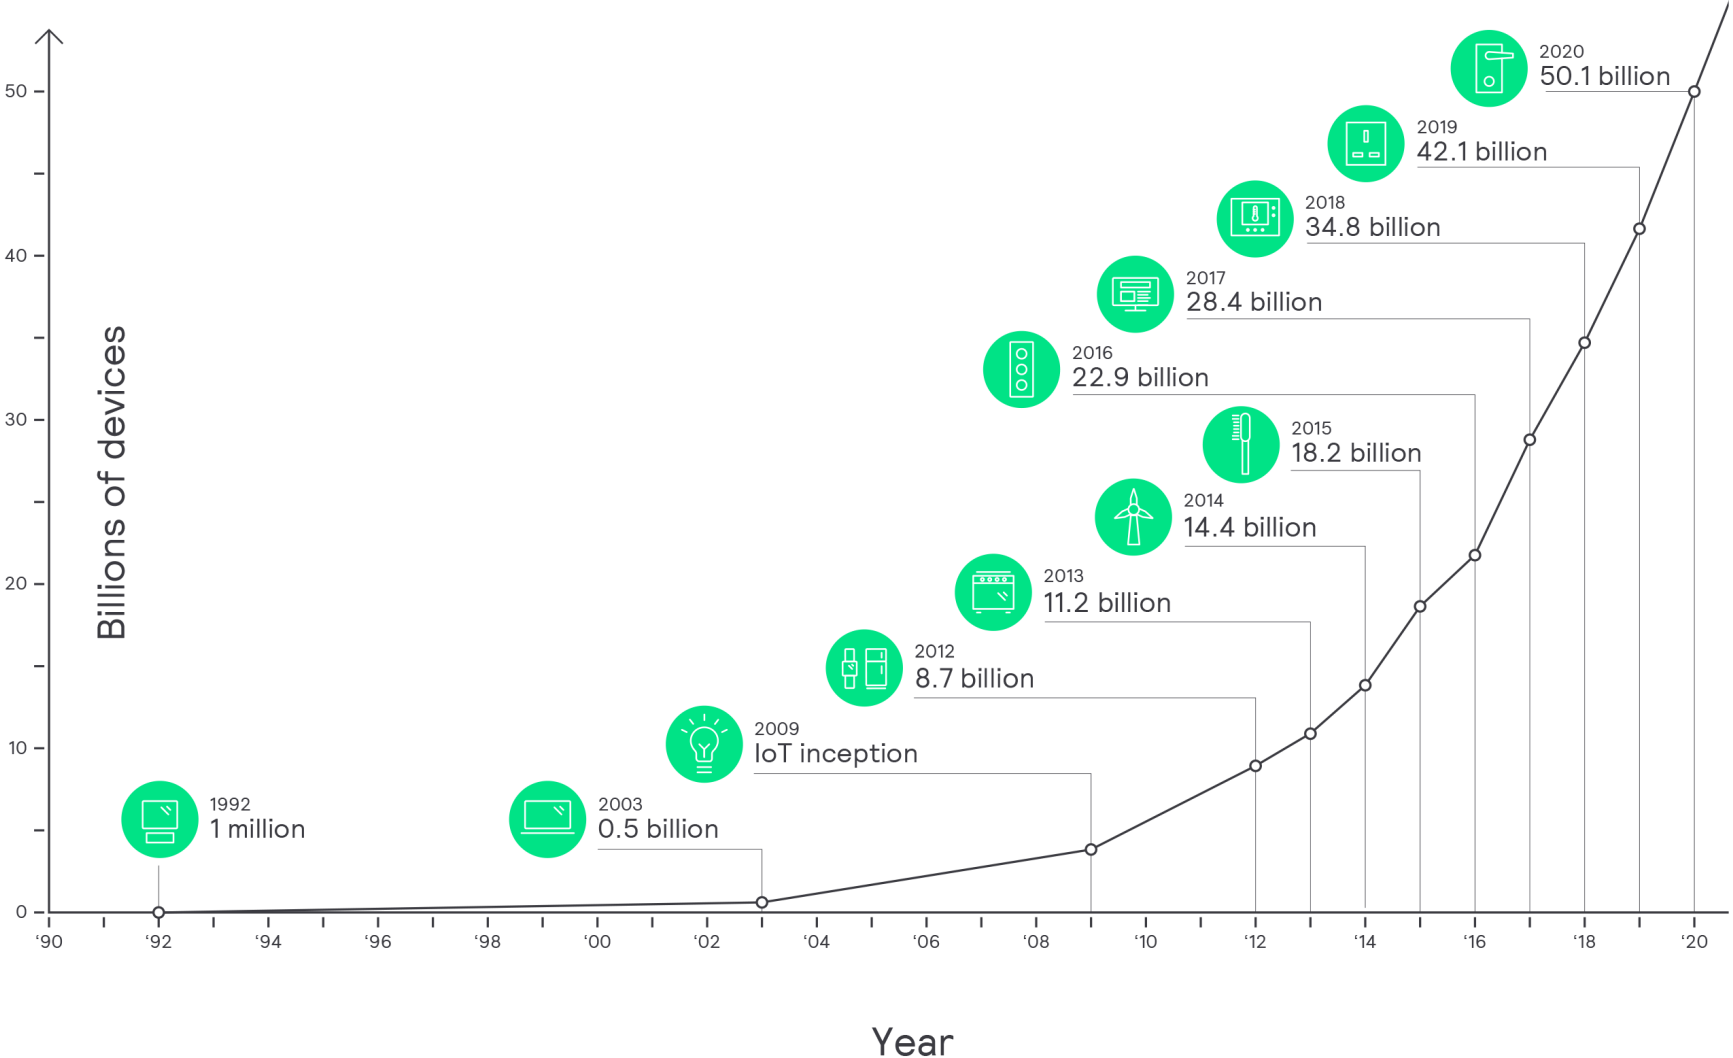

## Workplace Wellness Perks That Matter to Employees

A survey of 1,600 workers reveals that air and light matter much more than tech-based health tools.

# Our Brighter Lives, Better World 2025 program

*We aim to double our positive impact on the environment and society*

# Our sustainable growth areas emerge from addressing 5 global trends

## Climate Action

- Energy accounts for **60% of greenhouse gas emissions**
- Customers want **companies to take a stand on sustainability**

## Circular Economy

- World economy **only 9% circular**, while resources are increasingly scarce
- Governments launching **circular economy programs** to reduce waste

## Safety & Security

- Nearly **70% of population to live in cities** by 2050
- Smart streetlights used to **improve public safety** (e.g., gunshot detection, crowd analytics)

## Health & Wellbeing

- Global **wellbeing market grew** to \$4.2t at ~13% for the last 2 years
- Better lighting contributes to **16% increase in productivity**

## Food Availability

- **>25% of the world** experienced food insecurity in 2018
- **~70% food production increase** needed by 2035

Major Trends

Opportunity

- LED performance
- Systems offerings
- **Solar Lighting**

- **3D Printing**
- Circular programs; Service Tag

- Connected Infrastructure

You don't have to start **from scratch**

**The Series**

To ease the design process, we've done some of the design for you. Our range of high-quality pre-designed luminaires includes downlights, track lighting and pendants and offers a quick and easy solution to meet your needs. You can mix and match design elements, such as color or texture, for nearly endless possibilities.

**More products**

**Pendants**

**Decorative pendants**

**3D Series**  
Decorative Pendants  
• Track to your preference  
• High IP rating means a safe and secure design embraced into the surface of the fixture

**3D Series**  
Optical Features  
• Shows clear long-term relationship with the Philips Tailored Lighting LED luminaire  
• Built for re-design, easily change color, lampshade and other options by swapping them in a matter of minutes

**3D Series**  
Large and medium modern decorative pendant  
• Versatility of different designs  
• Resistant to scratches, fire, heat and other stress factors and textures  
• High IP rating of IP65 makes it suitable for use in outdoor environments

**3D Series**  
High Neck  
• Big output, very input: about our 25,000 lumen lamp or choose your own lumen choice from a variety of Philips LED LED replacement lamps  
• Multiple light sources possible  
• Lightweight and easy installation  
• Suspension that allows handling during installation

**3D Series**  
Low Neck  
• Big output, very input: about our 25,000 lumen lamp or choose your own lumen choice from a variety of Philips LED LED replacement lamps  
• Multiple light sources possible  
• Lightweight and easy installation  
• Suspension that allows handling during installation

**3D Series**

UV-C Luminaires

# Why use UV-C as disinfectant?

Reduce risk of exposure for office workers and visitors

Make office workers and visitors feel better protected

Enable business continuity by reducing disinfection cycle time

Prevent excessive spending on chemical sanitizers

### 3. ENHANCE AIR FILTRATION AND CLEANING using the central HVAC system and in-room air cleaning devices.

Install properly sized [MERV-13](#) air filters or the highest rated MERV filters that the HVAC system can accommodate. Close off any gaps around air filters to minimize air moving around them instead of through them.

Use [portable air cleaners](#) to increase air cleaning rates in areas where air flow and central filtration are insufficient.

- Select devices that are appropriately [sized for the space](#) in which they will be used. Consider [ENERGY STAR](#) certified products. If noise is a consideration, look for a product with lowest perceived sound levels.
- As a temporary measure, [do-it-yourself air cleaners](#) can also be built from HVAC filters and box fans.

Increase ventilation and/or filtration in areas with higher emission of airborne particles and aerosols (e.g., cafeterias, or choir/music rooms at schools). You can make adjustments for these areas by:

- Increasing the volume of clean, outdoor air delivery.
- Using portable air cleaners.
- Setting up extra exhaust ventilation to move air directly to the outside.

Consider an upper-room [Ultraviolet Germicidal Irradiation \(UVGI\)](#) system to clean the air. (UVGI systems require professional design and installation, in consultation with experts.)

Big News!

- EPA and White House clarifications on Air Filtration and cleaning spending

## UL Certification Compliance

*Ensuring a safe application*

*Underwriters Laboratories has developed a set of standards solely for the purpose of establishing requirements for the safe and effective installation and operation of UV-C luminaires and solutions.*

**Testing requirement : The equipment shall be offset from its intended mounting surface angle by 1 degrees whenever such an offset is likely to produce a more severe test result**

## UL 1598 Safety Certified Germicidal UV system

***Compliance on measurement technique to ensure safety***

- ✓ Measurement in accordance with IEC 62471
- ✓ Defining the risk group as per IEC TR 62471-2
- ✓ Guidance on minimum mounting height
- ✓ Peak emission value irradiance measurement to assist installers with site planning.
- ✓ Requisite labeling and installation instructions.
- ✓ Guidance instructions on installation, operation, maintenance, and personal protective equipment for service personal in line with UL regulations
- ✓ Specify installer site planning responsibilities.

## Control systems

- Dynalite UV-C control system ensures that an **authorized operator** can manage the UV-C solution for optimal protection.
- By incorporating **multiple mechanical and network safeguards**, the control system provides confidence that the UV-C devices will be operated in a proper way and that the appropriate UV-C dosage is applied.

## Early Proposal - Total System architecture

### Protection

- Constant monitoring to ensure that no occupant will be directly exposed to the UV-C lamps
- Ensure that the correct conditions have been met for an authorized user to begin the UV-C cycle

### Redundancy

- Mechanically isolated switches ensure the automated system cannot self-trigger a cycle and that - if required - an emergency stop button will cut power to the UV-C lamps
- The system checks its own network sensors and inputs to ensure that no network device has gone off-line which would lead to a false indication of occupancy status

### Simple to deploy

- A single box solution
- Use of industry standard dry contact inputs reduce complexity of installation
- Network sensors are configured for self-discovery so no need for any on-site configuration

### Ease of use

- The control cabinet gives a clear info on the status of the different input conditions
- The only requirement is to set the disinfection time via the Antumbra Display panel mounted on the outside and key operation to begin the cycle; All other process are automated and monitored

### Monitor and Manage

- All network messages are being tracked and stored; Any issue, such as run time of the lamps, can be traced and the data can be used for preventative maintenance and re-lamping activities

### Correct usage

- The UV-C lamps must run for a pre-described time to ensure that full disinfection of an area has taken place
- An automated system can ensure this and report back if there has been any issues in performing the full duty cycle

The radio spectrum does not provide enough room to grow.

On top of that there is a growing concern on security using radio-communication

# Lighting can provide additional spectrum to communicate

# TruLifi: Expanding data bandwidth through light communication

- **Secure**
  - We want to work wireless but privacy is crucial for our business. LiFi offers a strict definition of your communication area.
- **Reliable**
  - We want a stable data rate per user despite the number of users. LiFi 'offloads' WiFi in high traffic areas.
- **Fast**
  - Cloud solutions, bigger files, more online meetings require a fast high quality connection.

Trulifi range: Reliable, Secure, Fast

Leveraging Lighting infrastructure

Trulifi 6001, launched 2018. Integrated into Philips luminaires: uses visible light 30Mbps.

Trulifi 6002 series: New. Integrated or retrofitted into Philips luminaires: Infrared. 150 Mbps, 128 bit.

LiFi as communication technology

Trulifi 6013. New. Fixed point-to-point system: 250 Mbps. Uses three different light colors.

HSV Hamburg

"We opted for LiFi given the increasing demand for bandwidth from journalists using our press center. For them a reliable wireless connection is everything. Now they have good quality light to write their stories along with a reliable, fast and highly secure wireless connection," said Daniel Nolte, segment leader area organization & infrastructure at HSV.

# BrightSites

## Smart grid of the future

- IOT Smart Pole Hub to help close connectivity gap
- Broadband Luminaires on existing poles to provide 60GHz “wireless fiber” backbone to support:
  - Public Wi-Fi
  - Fixed Wireless Access to MDUs
  - IOT Cameras
  - Environmental Sensors

- **Connectivity densification**

- 4G, 5G, Wi-Fi offloading and shared spectrum
- Integrated cloud-based communication and IoT services platform

- **Scalable urban infrastructure**

- Standard light infrastructure enables rapid expansion
- Repeatable solution to fit multiple market needs simultaneously

## Smart Community Testbed

# With our solution we enable the connectivity grid of the future

<https://youtu.be/aaHrMlyLpoM>

- 1 Light pole grid
- 2 Smart Hub
- 3 Upgrade pole
- 4 Activate pole
- 5 Meshed network

# Our solution complements the “Lighting as IoT” vision

## Interact

Smart power metering, data brokerage and infrastructure health monitoring (incl. 3rd party), Infrastructure marketplace

APIs

City Management SW Platform

### Connected Lighting

- Existing sensor based connected luminaires
- Offer narrow band IoT services through Interact

Division 26 –  
Electrical/Lighting/  
Lighting Controls

### Hub

- Fiber hub with intelligent services
- Telco compliant architecture (edge compute)

### Broadband luminaire (NEW)

- Wireless fiber (802.11ay) broadband services luminaires
- Integrated telco grade power distribution and surge control

Division 26 & 27 –  
Communications

### Smart Pole

- Small cells (RRU with 5G / CBRS / WiFi)
- Neutral host for battery units

### Network Architecture Example

### Benefits

- 50% lower deployment costs
- New revenue stream through activated light poles
- Scalable and aesthetic e2e solution
- Operational efficiency (Interact)
