### Introduction:

Schaedler Yesco Distribution, Inc. is a family-owned electrical distributor that supplies products and services to Industrial, Original Equipment Manufacturers (OEM), Contractor, Commercial and Government markets in Pennsylvania, Ohio and New York. Schaedler Yesco is dedicated to continuously learning about and meeting the requirements of government. We proactively follow current contracts and programs that provide you with greater purchasing power. We have been a contract supplier to the State of PA for many years and through our partnership with Supply Force we offer the benefits of GSA purchasing to our Federal Customers.

Our mission is to enhance our customers' performance and profitability by being the leading provider of distributor services and solutions.

### Capabilities:

For nearly 100 years, Schaedler Yesco has focused on providing specialized product knowledge and value-add services to our customers. We offer a broad line of products from major vendors and ancillary services to address our customers' specific electrical needs. We've created an Inventory Management Solutions Group to help you reduce your storeroom inventory and increase cash flow, an Energy Savings Group to identify energy waste and offer cost effective energy reduction solutions, and a Switchgear and Lighting Design Group to assist you with choosing the appropriate electrical power and lighting solutions.

### Facilities and Equipment:

Schaedler Yesco is continually expanding. Each branch has a showroom and warehouse for accessible personal assistance and material pick up. However, the majority of customer orders are filled directly from one of our strategically placed distribution centers.
