

## Security & Surveillance

The seasoned professionals on Schaedler Yesco's DataComm team understand that safety and security are a critical element to running a business. From life safety and access systems to CCTV and call systems, our in-house specialists have both the certifications and in-the-field experience to create the right solution for you.

### SOUND, SECURITY, FIRE ALARM

- Access Control
- CCTV cable and products
- Coaxial Cable (RG 6, 11, 59, Hardline, etc.)
- DVR's, Cameras, Access Control
- F and BNC connectors
- Fire Alarm Systems & Cable
- IP CCTV/Video
- Low Voltage Cable
- Paging Systems (Overhead Paging & Sound)
- Video Surveillance Systems

#### Access Control

IP-based access control systems (both wired and WiFi) can be designed for an entire building or a specific area. Access is available via slider cards, proximity cards, or even biometrics.

#### Call Systems

A call system can be a simple telephony project. It can also be an intercom call system or an emergency blue pole system, like those found on campuses or parks. Solutions can be wired, wireless, solar, or cellular.

#### Security & Surveillance

Security through alarm systems or CCTV can be designed as either wired or wireless systems. Remote access and programmable analytics via desktop, mobile device, or tablet help you keep watch on unwanted activity.

#### Fire Alarms

Fire safety starts with smoke and fire detection through ceiling or duct sensors. Systems can be designed with strobes and sound. Remote monitoring is available via desktop, mobile device, or tablet.
