

Security & Surveillance

The seasoned professionals on Schaedler Yesco's DataComm team understand that safety and security are a critical element to running a business. From life safety and access systems to CCTV and call systems, our in-house specialists have both the certifications and in-the-field experience to create the right solution for you.

SOUND, SECURITY, FIRE ALARM

- Access Control
- CCTV cable and products
- Coaxial Cable (RG 6, 11, 59, Hardline, etc.)
- F and BNC connectors
- Fire Alarm Systems & Cable
- Low Voltage Cable
- Paging Systems (Overhead Paging & Sound)
- Video Surveillance Systems
- Nurse Call
- Area of Rescue
- Mass Notification
- Cell Signal Booster Systems

Access Control

Access control systems can be designed for small offices of just a few people or entire facilities comprising thousands of individuals. Access is available via proximity cards, key fobs, biometrics, and Near Field Communications (NFC) on your mobile device

Call Systems

A call system can be a simple telephony project. It can also be an intercom call system or an emergency blue pole system, like those found on campuses or parks. Solutions can be wired, wireless, solar, or cellular.

Security & Surveillance

Security through alarm systems or CCTV can be designed as either wired or wireless systems. Remote access and programmable analytics via desktop, mobile device, or tablet help you keep watch on your valuable assets.

Fire Alarms

Fire safety starts with detection and alerting building occupants through the use of fire alarm systems. Systems can be designed with strobes and sound. Remote monitoring is available via desktop, mobile device, or tablet.
