

Healthcare Solutions

When it comes to managing your facility, reliability and efficiency are critical. The Schaedler Yesco Team knows how important choosing the right solution is to you, your facility team, and your patients.

Access to Inventory

With 29 locations throughout Pennsylvania, Ohio, and New York, local availability of both product and technical support is close by. We also offer a fully customized Inventory Management Service that is housed right in your facility so your team can react to issues quickly and efficiently. We offer hospital-grade electrical and data supplies for your special needs.

Project Planning

For projects outside everyday maintenance and repair, we offer a variety of specialized in-house development services:

- Lighting & Lighting Control
- Power Quality
- Security & Surveillance
- Back Up Power
- Access Control
- Fire and Safety Alarming
- Energy Savings

From daily facility management to complete project planning, the specialists at Schaedler Yesco are trained to understand the unique needs of healthcare facilities and offer practical, valuable solutions that meet patient/facility safety regulations.

Procurement Expertise

Our team is available to discuss ways to navigate contract issues, determine your best purchasing options, coordinate a creative supply channel solution and offer additional services that will help you meet your departmental needs while complying with purchasing regulations. When choosing Schaedler Yesco, you also have the added benefit of our participation in COSTARS. With several contracts and expertise in this program, we can help you navigate both MRO and project purchases to be compliant and cost effective.

Real life experience. Real life solutions.
