InventoryAssuranceSM

ASSURING THE RELIABILITY OF YOUR SPARE PARTS INVENTORY

At Rockwell Automation we understand the criticality of keeping your machines up and running ... that means reliable spare parts when you take them off the storeroom shelves. Rockwell Automation is introducing the InventoryAssuranceSM service which provides a comprehensive testing service for your suspect spare parts inventory.

InventoryAssurance allows you to avoid costly downtime by insuring the integrity of repairable Rockwell Automation spare parts. This service targets your suspect spares inventory in need of validation due to the following:

- Broken sealed containers in storeroom
- Environmental exposure (temperature, humidity, vibration, electro static, etc.)
- Extended shelf life (component life)
- Suspect inventory (repair work performed by unauthorized companies)

This cost effective service allows you to send repairable Rockwell Automation products to our certified remanufacturing facilities for inspection and comprehensive pass/fail testing.

- Units found to possess the most recent firmware updates and pass all testing will be repackaged and returned with a one (1) year warranty.
- Any units requiring firmware update or failing any test will be remanufactured to factory specification with any testing fees applied to the remanufacture.

To begin your InventoryAssurance program gather your suspect units and contact Schaedler Yesco. Once returned, you will have confidence in the integrity of your spares when the need arise.

InventoryAssurance BENEFITS:

- Guarantees the integrity of spare parts inventory
- Eliminates costly downtime of production
- Critical Firmware Updates
- High Quality Remanufacturing Service
- One year Remanufacturing Warranty
- Improved plant performance

ORIGINAL COMPONENT REPLACEMENT

Your boards will be updated with components that meet or exceed rigid Rockwell Automation quality standards. These components are pre-screened, burned in, qualified and specifically selected for industrial applications. Additionally, copyrighting on intellectual property contained in its firmware prohibits others from making unauthorized copies.

PRODUCT UPDATES / REVISIONS / ENGINEERING CHANGE RECORDS

Your module is cleaned, inspected and updated to the latest applicable hardware and copyrighted Stress Firmware revisions. This helps extend the life expectancy and permits integration with newer, More sophisticated products.

PRODUCT ENHANCEMENTS

Utilizing a proactive preventive maintenance approach to Remanufacturing Services, your suspect electronic and mechanical parts are replaced with Rockwell Automation specified quality components, based on current Knowledge and evaluation. Full functional testing and full load testing (where applicable) are utilized on each and every unit as specified by Rockwell Automaton design engineers testing is utilized to push products to functional and environmental limits. Only we know the difference between our design specifications and functional limits for testing.

QUALITY

Rockwell Automation warranty rates prove that our methodologies for remanufacturing and repair are superior to 3rd party repair houses. Our studies show that utilizing thirdparty repair houses can expose the customer To warranty failures more than 3 times that of our remanufacturing process.
