

## Cash Back for Energy Efficient Projects

Schaedler Yesco can help connect you to cash incentives for energy retrofit projects. By implementing energy efficient electrical products, you have a potential to get back various incentives to financially support your energy savings project. Our experienced specialists can help select the proper energy-compliant products based on your specific application.

### End User Types

- Industrial
- Commercial
- K-12 and Universities
- Healthcare
- Government, Non-Profit, and Institutions
- Contractors and Installers

### Application Focus

- Demand Side Reduction
- Lighting Systems
- Power Distribution
- Motor Control System
- Energy Measurement

## The Process

1. Data Gathering or Simple Audit
2. Application and Electric Bill Analyses
3. Product Selection (energy savings compliant)
4. Incentive Potential
5. Return on Investment (ROI)
6. Project Coordination
