Wireless Systems
Deployed in the Field

It just works

Not all wireless is created equal

- Lutron developed the first wireless control systems in 1996
- Designed to be as reliable as any wired system
- Vive was developed in 2016, based on several key Lutron technologies that ensure reliability and performance

Vive – System Architecture

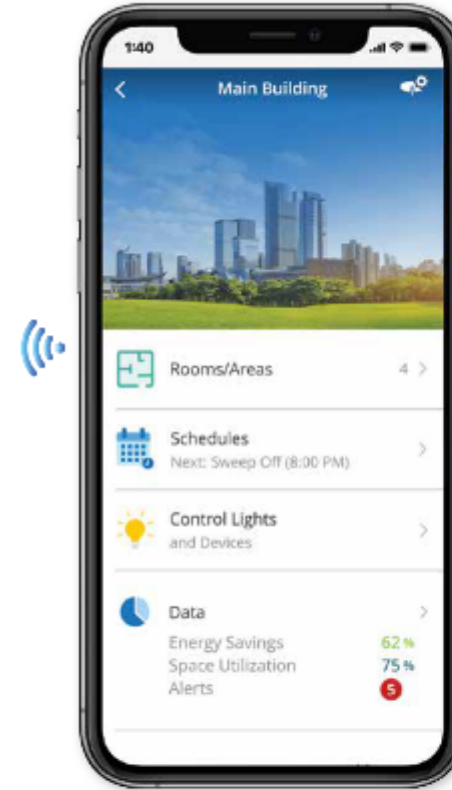

Flexible, wireless controls and sensors for simple, code-compliant design

Add wireless hubs for centralized control and integration (optional)

Simple-to-use software

Vive software

Communication protocols

Communicate via RF to control components

Communicate via WiFi to smart devices

Communicate via wired Ethernet to Vive hub

Vive Components

PowPak – Ceiling/J-Box mount remote load controllers

Installs to a standard junction box to eliminate wiring in the walls.

Ceiling mount

Ceiling controls

Reliable wireless communication

Tabletop

New! Line-Powered Pico wireless control

Provides a battery-free keypad solution for Vive customers

- 120-277V~ (neutral required)
- 2B, 2BRL, & 3BRL button configurations
- North America (434 MHz only) – USA, Canada, Mexico
- Available in (gloss) white, black, ivory, light almond

Wireless sensors

Wireless sensors are available in many configurations to fit your application:

- Ceiling Mount Occupancy/Vacancy
- Corner Mount Occupancy/Vacancy
- Hallway Occupancy/Vacancy
- Wireless Daylight Sensor

Wireless sensors

Ceiling

324 ft² @ H = 8 ft
676 ft² @ H = 12 ft

Coverage:

Wall

1,500 ft² – minor motion
3,000 ft² – major motion

Corner

1,500 ft² – minor motion
3,000 ft² – major motion

Hallway

Coverage varies by hallway dimensions

Product:

LRF2-OCR2B

LRF2-OWLB

LRF2-OKLB

LRF2-OHLB

Automatic daylighting

In-wall RF dimmer sensor

- Combines occupancy sensing, manual control, and system connectivity in one piece of hardware
- Easily add additional wall controls and sensors without running new wire
- Easy to install; directly replace an existing wallbox control
- Communicate to other wireless devices using Lutron Clear Connect RF technology
- Two Versions
 - 0-10V Dimming (MRF2S-8SD010-XX)
 - Switching (MRF2S-8SS-XX)

Integrated wireless receptacle control

- Wireless control built right into the receptacle for direct communication to wireless sensors, Pico remotes, and the Vive wireless hub
- Install the wireless receptacle and integrate with occupancy sensors and the Vive system – with no other parts and pieces

Wireless hubs

Basic

- Timeclock, Demand Response, Energy Reporting

Advanced

- Timeclock, Demand Response, Energy Reporting
- BACnet

Wireless hubs

Devices

Vive PowPak RF Rules

Wireless sensors and controls *must be located within 60 ft (18 m) line of sight, or 30 ft (9 m), through walls, of the associated control module. The 60 ft (18 m) range is not reduced by a ceiling tile obstruction.

Seamlessly integrate with building systems

Vive wireless hub available with native BACnet – no additional interfaces or parts are needed.

Vive wireless hub

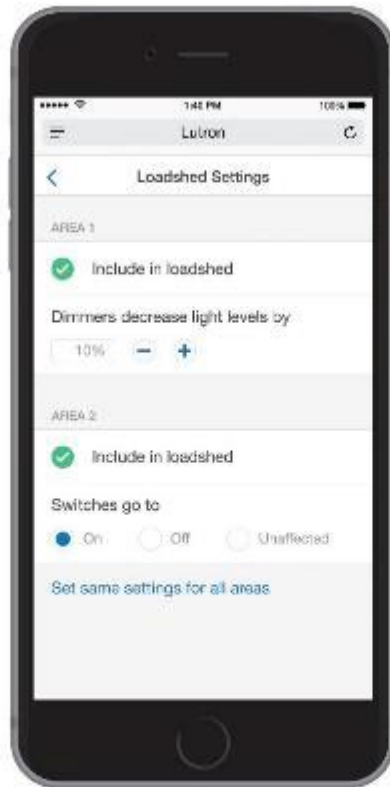

-  Building/energy management systems (BMS/EMS)
-  Energy dashboards & analytics packages
-  Maintenance & work order management systems
-  HVAC
-  Fire & safety
-  Access & security
-  Audio & video
-  Metering
-  IT

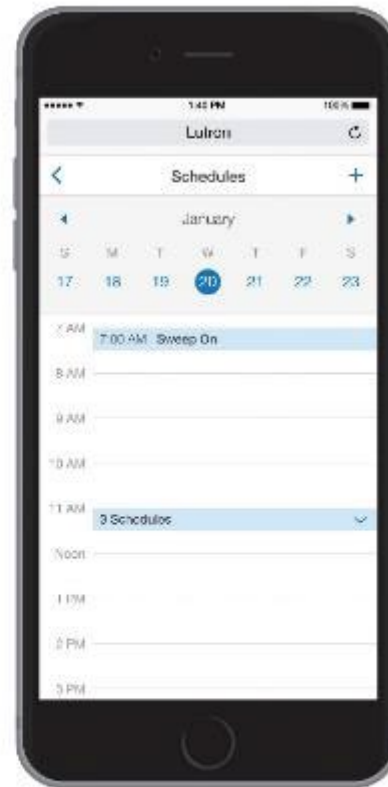

Web-based software with multiple functions

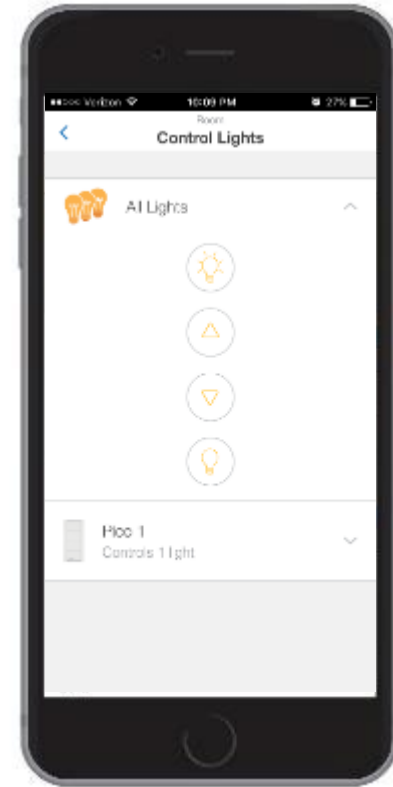

Energy reporting

Load shed

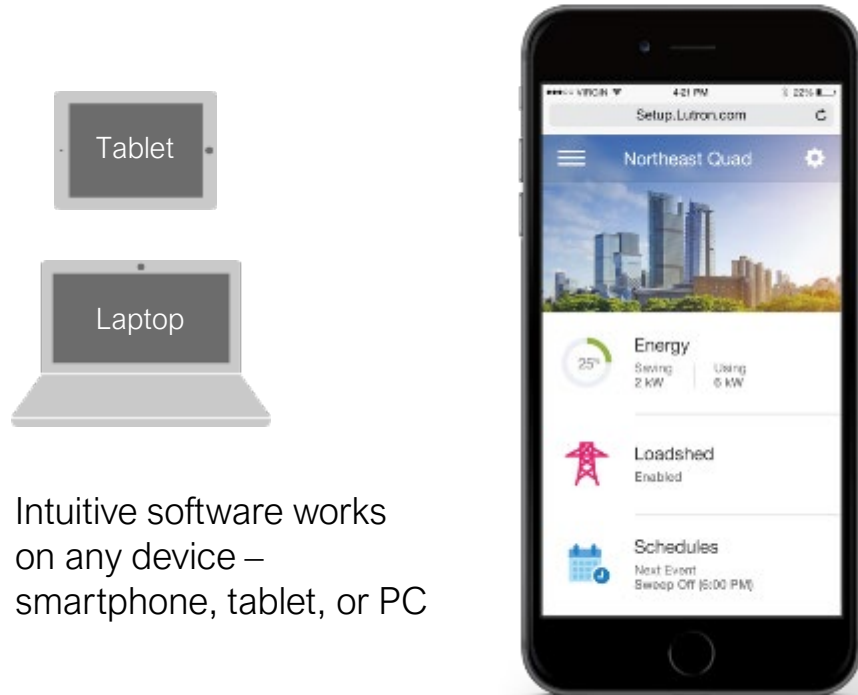

Schedules

Manual control

Setup via any device

All you need is WiFi and a browser to get started.

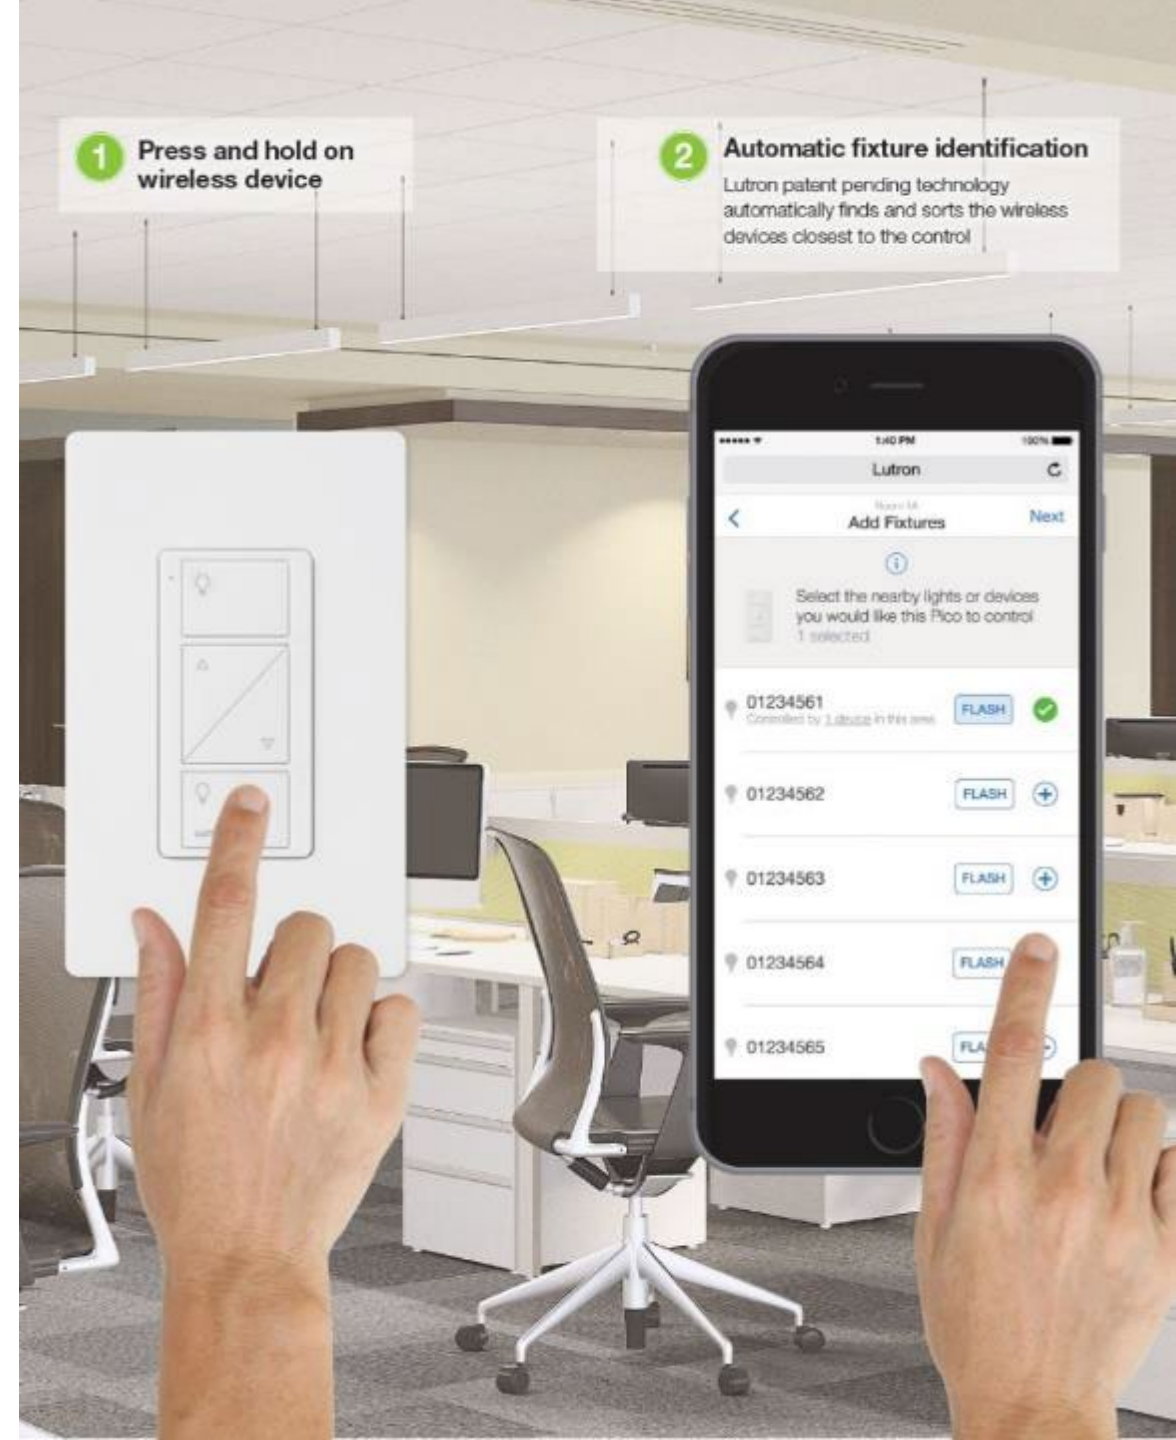

Intuitive software works on any device – smartphone, tablet, or PC

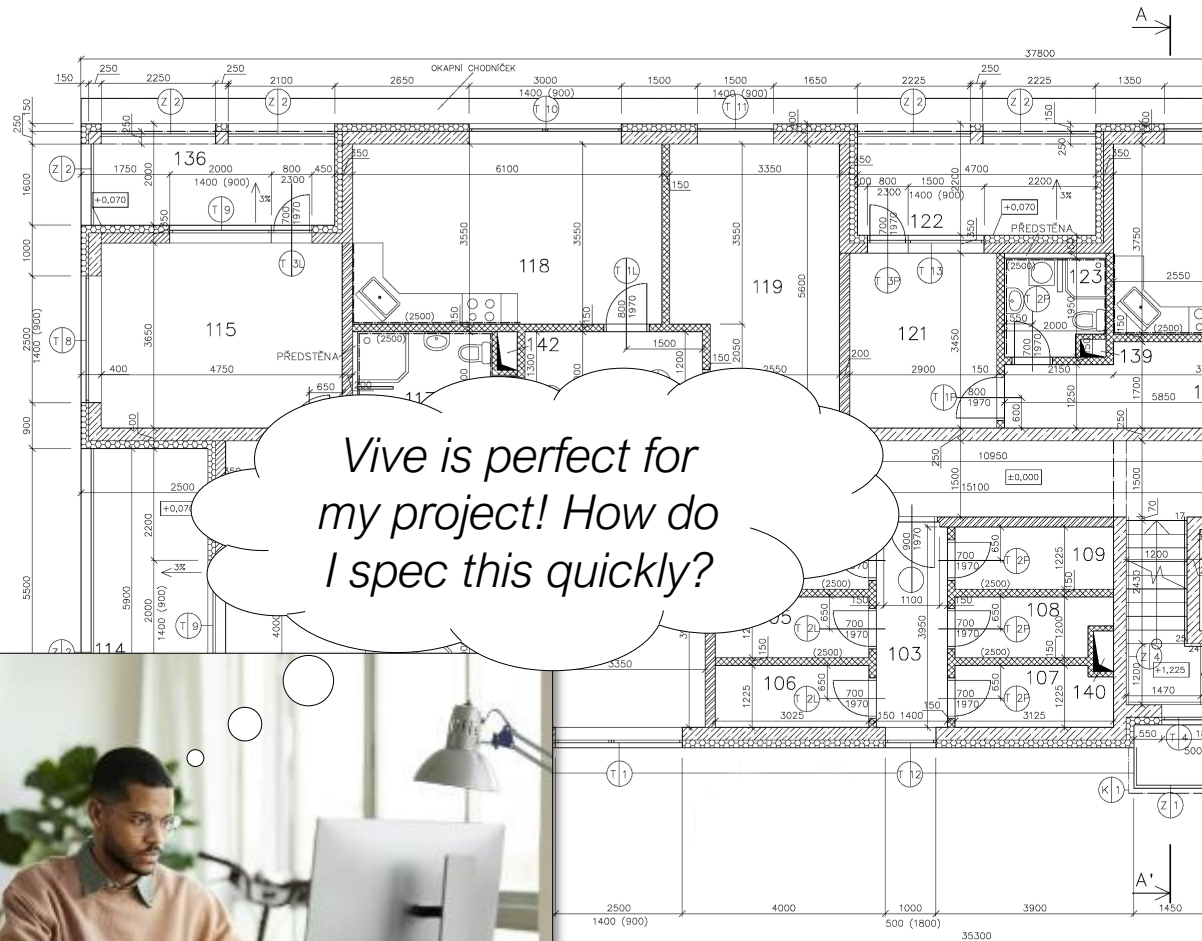

Easy association

- Finds nearby devices based on RF signal strength to make job setup faster
- Intuitive graphic design walks through the steps and shows how the devices are programmed to communicate together visually

Vive Meets Project Requirements

Occupancy/vacancy sensing turns lights on when occupants are in a space and off when they vacate the space.

Potential savings

20–60%
Lighting

Daylight harvesting dims electric lights when daylight is available to light the space.

25–60%
Lighting

High-end trim sets the maximum light level based on customer requirements in each space.

10–30%
Lighting

Personal dimming control gives occupants the ability to adjust the light level.

10–20%
Lighting

Scheduling provides pre-programmed changes in light levels based on time of day.

10–20%
Lighting

HVAC integration controls heating, ventilation, and air conditioning systems through contact closure, or BACnet protocol.

5–15%
HVAC

Load shedding automatically reduces lighting loads during peak electricity usage times.

30–50%
Peak Period

System Optimisation Service from Lutron identifies important lighting control adjustments to save additional energy and create a more productive work environment on an ongoing basis.

Retro Fit/C-Flex Demand is Huge, Never Better

- Lutron Ballast End of Life 12/31/2023, no Distribution Inventory
 - All Installed Lutron Customers are planning their strategy – life after Ballasts
- 70% of all Commercial Lighting is FL + Switched
 - 12 States outlaw FL after '24, Canada Outlaw Ballast end of '23
- Multi Year Commercial New Construction Demand Drops,
 - High Vacancy Rates – Chicago near 30%, Work From Home Continues
 - Class A Office Renovate to Maintain/Attract Tenants
 - Lutron Sales Team Pivot on Installed Base/Retrofits
- Code Driven Funded by Rebates – Be the Expert on Rebate/Code
 - Major City Require OCC and Watts per Sq Ft for Renovation
 - Utility Rebate shifts to Networked Fixtures vs. Load Reduction

Want a New Look? Want to Add Controls?

1 piece design = easy install

1st to market

...to have the ability to be installed as a retrofit kit and as a new fixture

...is a door style retrofit kit with just one piece, creating a seamless, no air gap look

...you can choose from a volumetric or a flat panel design

3 sizes to choose from (2x2, 2x4, 1x4)

- <https://www.youtube.com/watch?v=n9A2CEH2oxw>

- Wired Control Interfaces
 - 0-10V, EcoSystem or Lutron 3 Wire
- Wireless Controls
 - Vive – RF only, RF + OCC
 - BLE – Bluetooth 2.4 Ghz
- Tunable White
 - Athena – RF only, RF + OCC
- Fixtures Options - Volumetric, Flat
 - 2x2, 2x4, 1x4, Custom
 - Emergency and Air Handling options

Cove Lighting with Vive up to 160'

ACCESSORIES

SEAMLESS CONNECTOR*

RP-LBI-SSC-DIM (sold separately)
Links the OCC control signal to all bars.
RP-LBI-SSC-NODIM (sold separately)
Isolates each OCC control group within the continuous run.

*All continuous run installations require seamless connectors.

SURFACE MOUNT MAGNETIC CLIP

RP-LBI-SMM (2x included with bar)

SUSPENDED IN-LINE BRACKET KIT

RP-LBI-SIL (sold separately)
Recommended qty = number of bars + 1

T-BAR CLIP

RP-LBI-T1516 (sold separately)
Recommended qty = 2x per bar

4.7in SPACER CONNECTOR

RP-LBI-SRC-4.7IN (sold separately)

INCOMING POWER CABLES

*Connect up to 40 units on one incoming power cable

RA2 Select: What is it?

Whole Home Lighting Control Made Simple

- Best of Caseta: Simple, Reliable, and Affordable
- Best of RadioRA 2: Fashion, PRO Channels only, and Larger Projects

Designing the System: Three Simple Steps

Step 1: Add the main repeater

Step 2: Pick your devices

Step 3: Pick your Picos

Pick your devices

💡 Maestro dimmers and switches

Install in place of standard switches for dimming or switching control of the attached lighting, as well as system control from a Pico scene keypad.

✂ Maestro fan control

Control a ceiling fan without the hassle of pull chains.

📺 Plug-in appliance module

Plugs into a standard receptacle for control from a Pico scene keypad. Shuts off standby power to electronic appliances, such as computer monitors, when they're not in use.

🌡 Lutron wireless thermostat

Adjust heating or cooling from anywhere using your smartphone or tablet.

💡 Tabletop lamp dimmer

Plugs into a lamp/standard receptacle for dimming control, as well as system control from a Pico scene keypad.

💡 Plug-in dimming module

Plugs into a lamp/standard receptacle for control from a Pico scene keypad (module is designed to be concealed behind furniture).

Wireless Shades

Battery-powered shades

- Battery powered - 100% wire-free and easy to install
- Average 3-5 year battery life
- Near-silent, precise movement
- Affordable – starting at just under \$600

**Battery-Power
Honeycomb**

**Battery-Power
Roller**

Selection Guide
Sivoia. QS Triathlon.

Residence: _____ Room: _____ Window(s): _____

Step 1 Select Shade Style

Honeycomb Roller Headrail without fascia Fabric-wrapped fascia (regular roll only)

Roll orientation Regular - fabric closest to the glass (standard) Reverse - fabric furthest from the glass. Recommended to clear door or window hardware.

Step 2 Select Power

Battery-powered Plug-in Power Panel Manual shade

Step 3 Select Control

System Keypad Timeclock Mobile device Third-party integration Pico.

Standalone Pico. - for controlling a single shade or multiple shades with one button press. 4-group RF - for assigning a group of shades to each of the four group buttons on the remote.

Please note: Product options may vary depending on application and intended use. For more technical information, reference www.lutron.com or work with your qualified Lutron provider. Product availability is subject to change.

Step 4 Shade Mount and Measurements (choose one)

Inside Mount Roller shade Honeycomb shade

With Fascia Fully Recessed **Without Fascia Fully Recessed** **Fully Recessed**

3 1/4" (86mm) 3 1/4" (86mm) 2 1/4" (54mm)

Please note: For partial recess, the location of the mounting screw is 0.5" (13mm) in from the back of the bracket for roller shades and 7/8" (19mm) for honeycomb shades.

Width: A inches/mm B inches/mm C inches/mm Smallest width: inches/mm

Height: D inches/mm E inches/mm F inches/mm Largest height: inches/mm

Outside Mount on Trim Outside Mount above Trim (includes spacers)

Width: The width of your shades can be as wide as you want, depending on what you want the fabric to cover. Width: inches/mm

Height: Measure from the top of the headrail to the windowsill. Height: inches/mm

Note: If mounting above the trim, we recommend allowing for at least 3 1/4" (86mm) for honeycomb, 4.5" (114mm) for roller, of space above the top edge of the window trim for the shade brackets.

Step 5 Select Fabric

Utilize the insulating Honeycomb or Roller Essentials fabric binder or visit www.lutron.com/fabrics For more information, please download The Lutron Fabric Collections mobile app at the Apple store.

Fabric P/N: _____

Step 6 Honeycomb Shade Enhancements

Back Cover A back cover on the back of the headrail eliminates any light that may come through the mounting area (usually only used on room darkening, inside mount applications).

Cable-Guided (outside mount only) Select this if you are mounting a shade to a door. Choose anchor and matching hardware color: Snow Biscuit Sierra
